Dear Property Management,

On Sunday July 26th I was emptying my recycling at the recycling area. Upon re entering the building there was a large puddle of water at the entrance at the inner part of the building (at the doors). I had a large fall due to this puddle & landed on my hip. I noticed there is no drainage at this point of entry. It is my recommendation as a concerned resident & one who has now experienced a fall, that drainage be added in that area. This is a major safety concern.

Sincerely

Nelia Pacheco
