Installing Your Refrigerator

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding, tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).
2. Refer to illustration below to determine dimensions.
3. Allow 2" of clearance on hinge side of refrigerator when installing next to a wall where handle may make contact.
4. Allow 1" minimum clearance at rear for proper air circulation and exterior electrical connections. Allow a 3/8" minimum clearance at sides and top for ease of installation.
5. First, be sure each door and entry way in the home is wide enough for the refrigerator to be moved through easily.
