SAMSUNG Learn More

Three ovens in one

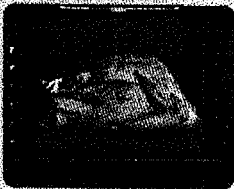

The Flex Duo™ system gives you ultimate control with upper and lower cooking zones that can be used independently or together – offering flexibility, while saving time and energy.

SMALL DISHES

TWO DIFFERENT DISHES

HOLIDAY LARGE DISHES

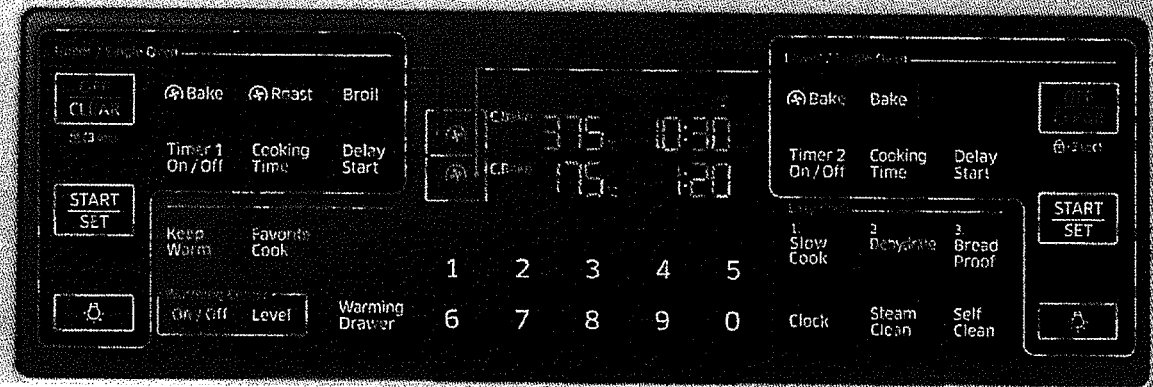

Easier, energy efficient oven access

A unique Dual Door is hinged in the middle, so you only need to open the top half to access the top half, energy efficiently.

Simple to control your cooking

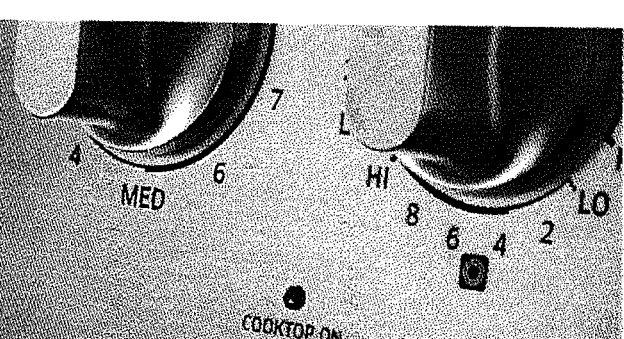

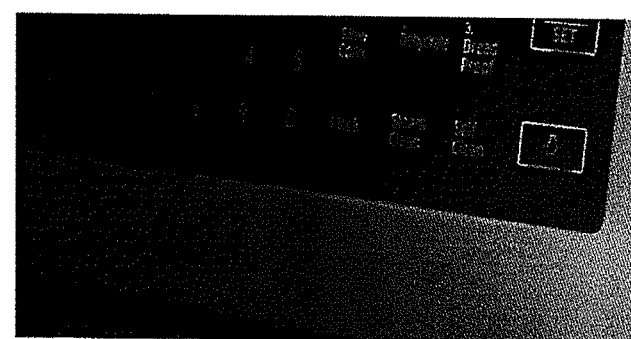

Has an ergonomically enhanced control panel with a clear blue graphic display and separately grouped buttons on both sides that control the top and bottom ovens, so it's easier to program and control your cooking.

Cook more dishes together

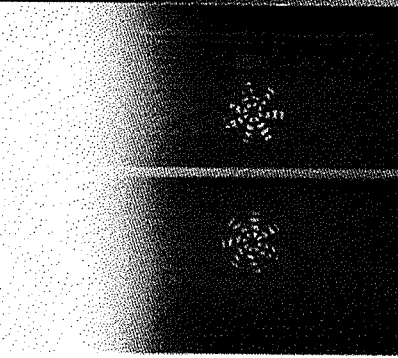

The Samsung oven's ceramic glass cooktop has a Bridge Burner that can be used as one long cooking area. So you can cook with various shapes and sizes of cookware and prepare everything much faster.

Fast and thorough cooking

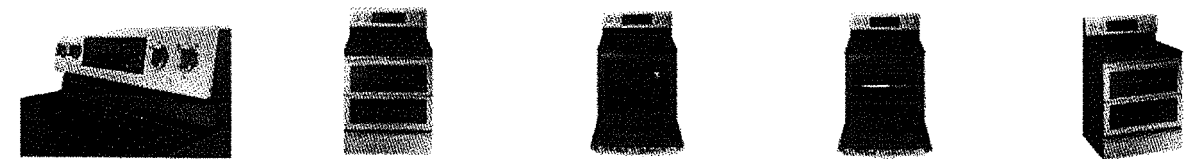

A True Convection system cooks food faster and more evenly, so it's great for baking and broiling. A heated fan distributes heat all around the oven, so dishes are cooked thoroughly and you enjoy tastier results.

Keep cooked food perfectly ready

A Warming Drawer keeps dishes perfectly warm until you're ready to serve. And by helping you to manage the balancing act of preparing and serving multiple dishes, you're free to focus on the rest of the meal.

I love this range

We bought this range in November last year and absolutely love it. My favorite part is the double oven and the convection feature works exceptionally well. When I cook, my food does not burn on the bottom like my previous oven did. It climbs to temperature very quickly and the food cooks evenly. I use the smaller oven more often than the big one but they both work great. If you are not used to convection ovens, I suggest to shorten the amount of time for cooking because the air circulating in the oven can make your food dry. If a recipe requires 20 minutes of cooking time, I would do 13 to 15 minutes. I highly recommend this range.

 Yes, I recommend this product.

Good range but the "fast burner" is super slow

I really love this range and in particular the top oven. I live in Florida and it saves me so much heat to be able to just use the top oven. My only complaint is that the "fast burner" on the front right side is super slow. It takes about twice the time as the other burners to boil water. One cup takes about 4.5 minutes - yes, minutes. It took me a couple of months to realize this. I called Samsung about it several times but they refuse to come out and even look at it. They said that if it was always that way, then it's not broken. It's frustrating to always have to use the back burner to boil water. For this price, I should be able to use all the burners.

best buy ever

I've only had my electric range for two days and I love it!! So far I've used most of the burners and they work very well reheating and cooking food. I made a very large pizza and was happy to see it cooked the topping beautifully (no gooey middle). Today I made two cakes and although they were done before the time ran out, they were so moist and not dried out like I thought they'd be. I also roasted a chicken and it cooked much faster than my old oven and it cooked evenly and it too was moist and tender. I am very happy I bought this particular brand. I love the double oven and, I will probably use the top oven most of the time unless I have a lot of cooking to do.

 Pros: High quality, Durable, very efficient

 Yes, I recommend this product.

Good stove but poor oven

I wanted to like this product but I can't get over the oven. First, some minor things that annoy me are the buttons are hard to press and I find myself having to press them more than once; the timers don't go above 99 minutes so

No. I do not recommend this product.

Nice features, but doesn't work correctly.

This oven does not work properly in full oven mode. The fans run intermittently (10 seconds on, 50 seconds off) in both "Bake" and "Convection bake" modes when setting temperatures under 400. Samsung claims that this is normal and denies that there is a problem. Yet in Samsung's own words, according to page 46 of the user manual, "When baking cakes, using "bake" mode will produce better results." And "Convection baking uses a fan to circulate the oven's heat evenly and continuously within the oven." So the only way for me to bake a cake is to use the bottom oven set at "bake" mode with the divider in. And the only way to use convection cooking under 400 degrees is to use the top oven which defeats the benefit of multiple rack positions in the large oven. So if you want a convection oven, don't buy this one.

Beauifful Range

This range really updated my kitchen. Black stainless is so rich looking. I like the style, the appearance of the front. Lots of burner selections. Cook top is easier to cleaner than my previous ceramic top range. I've only had it for 2 days. The only thing that concerns me is that the oven was slow to heat up. On the first use manual says, to heat at 400 degrees for one hour. It took 12 minutes to get to 400. At the end of that time I was waiting to put a pizza in there, even after pre heating, the pizza didn't brown on the bottom, after 15 mins. and it took my old oven about 11 mins. Might have to have that checked out. It might just that we're not use to each other yet. Love it.

- Pros: Bright display, great appearing range, beautiful finish
- Cons: oven could heat up faster

Yes, I recommend this product.

First one no good

This is a pretty stove with excellent feature, but that is where the positives end. After two weeks it quit working. Sure it's a new product and there are bound to be bugs but at a price point that is three times higher than any other in the market it should last longer than two weeks. Received the range on Oct 28th 2015. By Nov 15, 2015 the range quit working. When you turn the cook top knob the cook top light comes on but that is all that happens. None of the cook top ever heated up. So we try the ovens independently to see if the problem was isolated to the cook top, but it was not. The oven on light would come on, but that was it. Best Buy is sending a new one and I will update this review.

- Pros: pretty to look at
- Cons: Poor quality, Did not meet expectations, stopped working after two weeks

Yes, I recommend this product.

Originally posted on samsung.com

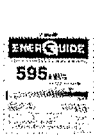

not purchase that at the time due to this. We just had an oven die, via different brand, and had to replace ours. When I saw this feature...I had to have it!!! It is so unique the way the doors open. I love it!!! It has so many clever features and I can't wait to become a "better" cook. And I love the new black stainless color. (The fridge is now in my future.) Thank you

- Pros: Realistic color, Bright display, Durable
- Yes, I recommend this product.

FEATURES

Use hygienically longer

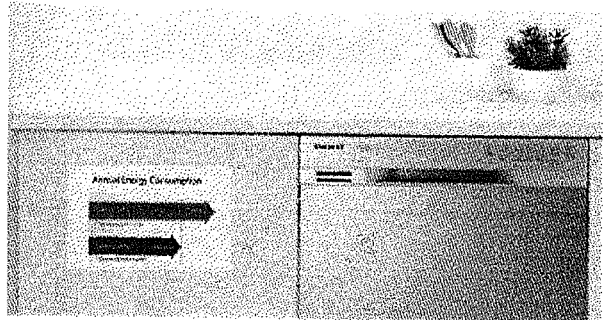

A Stainless Steel Tub is more durable, quieter and cleaner than plastic. It makes less noise and can wash more hygienically at higher temperatures. It's also resistant to staining and dirt, which prevents bad odors.

Quietest in class*

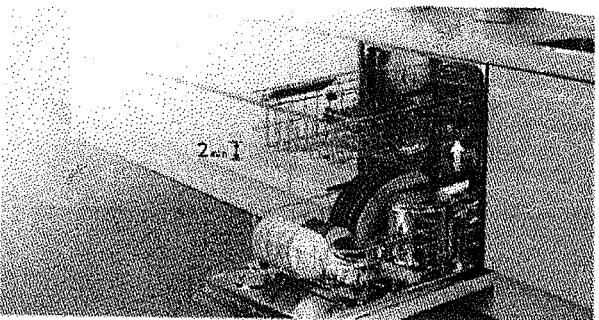

Designed to create much less noise, as its Stainless Steel Tub absorbs sound when it's working, so it has the lowest noise level in its class. At just 50 decibels the noise it creates is the same as a quiet stream.

Low energy consumption

ENERGY STAR® certified, so you can save money by using less energy and water with each cycle. This exceptional energy efficiency also reduces CO2 emissions and the impact on the environment.

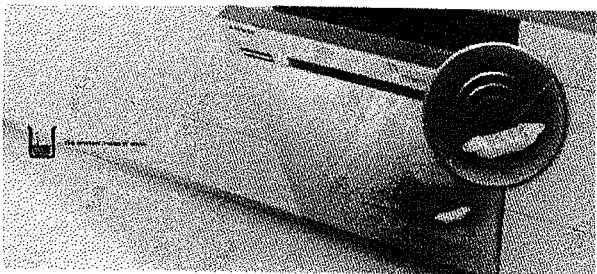

Fits bigger dishes

A Height Adjustment feature allows the upper rack to be quickly and simply raised up or down by an extra 2 inches. It can accommodate almost all dishes (up to 13.5 inches), so cleaning tall, wide and oversized pots and plates is easy.

A Concealed Heater enhances performance and safety by protecting plastic items from being damaged, melting and bursting into flames. It also prevents injuries caused by residual heat from the heating element.

A Smart Digital Leakage Sensor detects even the smallest traces of water and immediately shuts off the electrical connection. So it protects you from getting an electrical shock and any potentially expensive damage.

Not happy at all!!

I hv had this dishwasher for 2 years. Just placed a service call and it will cost ~350 to fix it due to an issue with it filling w water as normal and then emptying 5 mins later. No warranty after a year except motherboard. Had a GE for 11 years before this one. Never had an issue with it. BOO Samsung!

Nothing but trouble

Bought this nice looking dishwasher 2 years ago. It never really cleaned the dishes that well but we could live with that. It started having problems with an error code. It would start to fill then drain (apparently a common problem) Samsung service was of no help. Had repair fellow look at it and after replacing 4 parts still could not get it running. He suggested that it might need a whole new wiring harness but suggested we just buy a new machine since the repair would have been over half the cost of the machine.

☒ No, I do not recommend this product.

I wish I could give is less than 1 star

DO NOT BUY THIS! This is a horrible dishwasher, Samsung should not make appliances. It doesn't really clean dishes, often we need to re-wash dishes...there are actually too many problems to list. It looks nice, that's about it. I wish I had done more research and read reviews before buying this. We've had it almost 2 years and it was terrible since day 1.

☒ No, I do not recommend this product.

Review 1	This product is great all the way!		
Votes 0	Great machine! Very quiet and does an efficient job. Also love the "chimes" it makes when turned on and when the cycle finishes. The only down side is we couldn't figure out why the bin was always wet in the morning after a wash and that really bugged me! Finally we figured that since it had no visible heat element to dry (only air), we would try

Doesn't clean dishes.

No matter how well we rinse dishes, there is always crud left inside glasses and mugs in the top rack...really frustrating. Just when you think you can put the dishes away, more than 3/4 of the top rack has to be hand washed to actually be used. (Also didn't realize that there was no delay option, when purchased.)

☒ No, I do not recommend this product.

FEATURES

ONE TOUCH FOR OPTIMAL TEMPERATURE

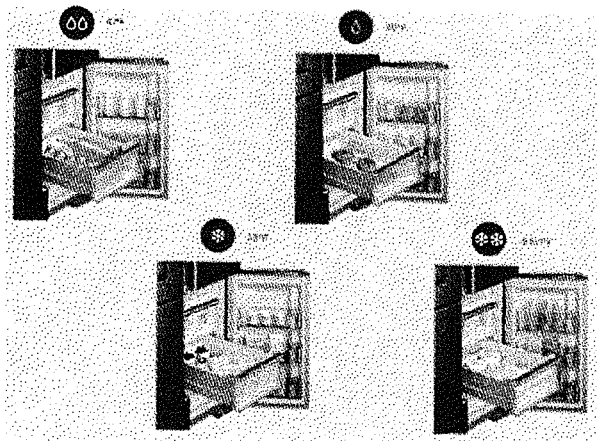

The RF9900's Chef Mode preserves the delicious, natural texture and flavor of food by minimizing the temperature fluctuation. By setting the fridge at 36°F, it automatically adjusts the Chef Pantry to 30°F, which is perfect for fish and meat. Fruit and vegetables stay fresh in Crisper Drawers. You can safely store ham, sausage and any smoked food separately in the Chef Basket.

KEEP FOOD FRESHER LONGER

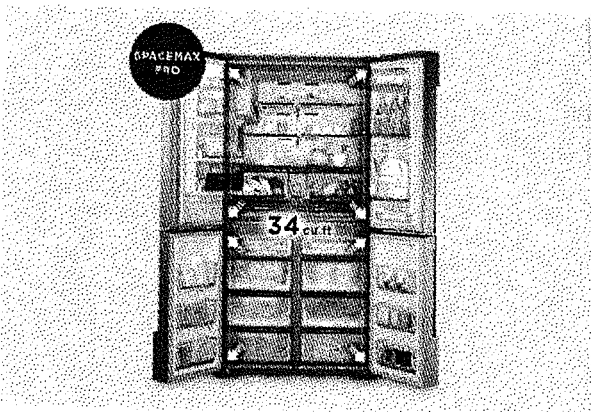

The Samsung Chef Collection refrigerator ensures food freshness and taste are never compromised thanks to a Triple Cooling System that provides precise temperature and humidity control in all three zones, ensuring maximum freshness. A Metal Cooling plate in the rear wall reduces the loss of cold air when the door is opened, maintaining optimal temperatures at all times.

SWITCHABLE WHENEVER AMONG 4 SETTINGS

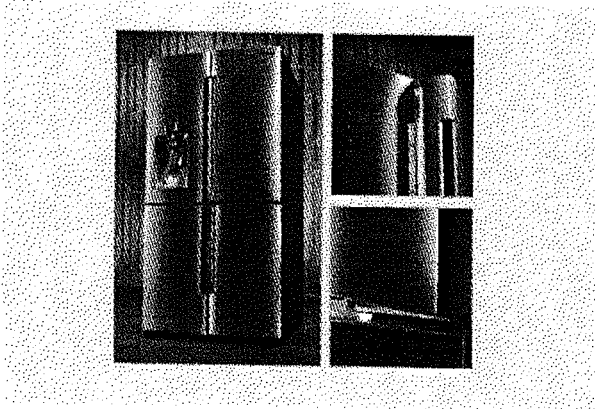

WORLD'S LARGEST CAPACITY*

Staying true to typical exterior dimensions, the Samsung Chef Collection refrigerator boasts the world's largest interior capacity at an impressive 34 cu

REFINED & INCOMPARABLE DESIGN

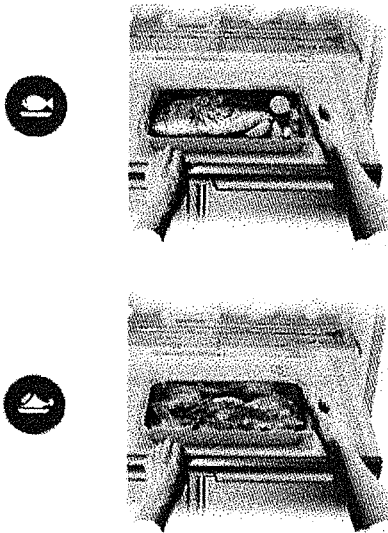

Refined is the word that best describes the incomparable design of the Samsung Chef Collection refrigerator. The all-metal and easy to care for stainless steel exterior is enhanced by unique LED Miracle Display that projects control settings on the refrigerator facade for a glowing effect. Recessed handles with chrome trim allow you to elegantly and effortlessly open the doors.

A NEW WAY TO ENJOY SPARKLING REFRESHMENT ANYTIME

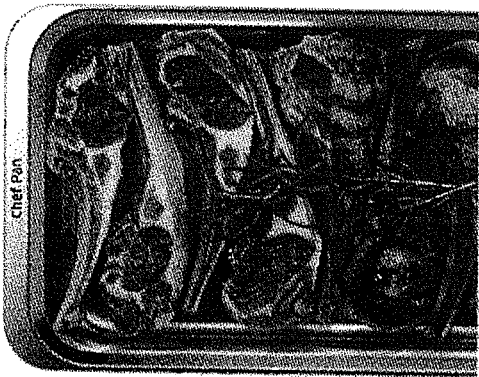

Lovers of sparkling water, rejoice! The Samsung New RF9900 features built-in carbonation for convenient sparkling water on demand. Now you can add your own flavors and adjust the level of carbonation to create bubbly beverage favorites at the touch of a button.

PROFESSIOANL SPACE FOR FISH & MEAT

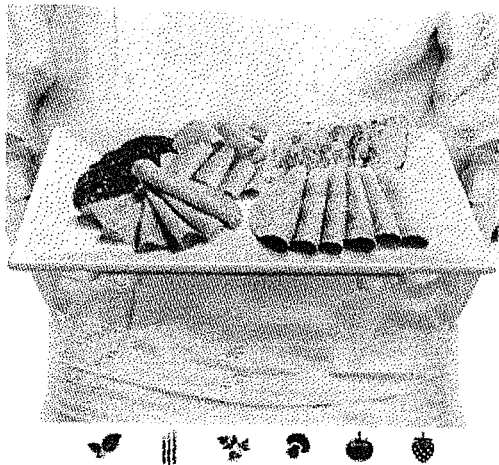

Keep meat and fish at their peak with the exclusive Chef Pantry on the Samsung Chef Collection refrigerator. Measuring more than 13 inches across and deep, it has an adjustable temperature setting to keep food at an optimal 30°F, which chefs consider ideal for maintaining flavor after seasoning.

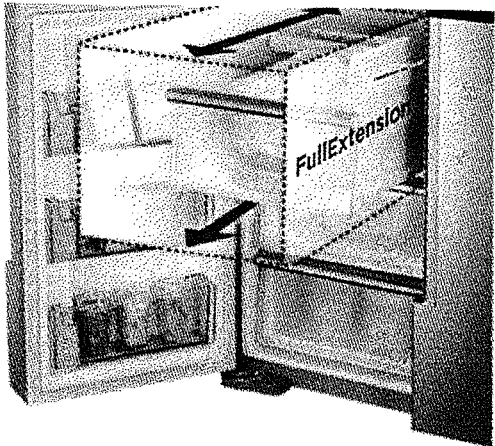

READY TO COOK

Prep and cook like a chef with the Chef Tray, a first-of-its-kind feature in the Samsung Chef Collection refrigerator. This hygienic stainless steel tray can be used to prepare, store and cook food, and then go right into the dishwasher for cleaning. It is easy to store under a shelf, in the wide pantry or in the freezer.

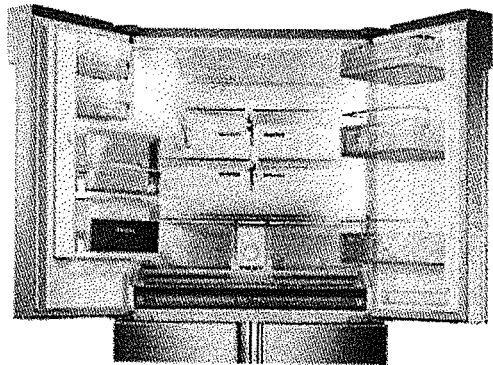

Protect precious produce like berries, tomatoes and mushrooms from getting smashed in crowded storage drawers. The Chef Basket located on the door of the Samsung Chef Collection refrigerator provides convenient separate storage for easy access to already washed and easily damaged fruits and vegetables. The clear container can be removed for convenience and easy cleaning.

Modeled after premium kitchen furniture, the FullExtension Tray feature on the Samsung Chef Collection refrigerator provides maximum access to freezer items. An advanced railing system allows you to smoothly pull out the deep tray to efficiently reach the full depth of the container. Easy to organize, it holds up to 2x heavier items, and feature a smooth soft-closing mechanism.

EVERY CORNER ILLUMINATED

Typical LED lighting is taken up a notch with the innovative Pillar Lighting feature installed on the Samsung Chef Collection refrigerator. Instead of standard bulbs, this refrigerator is flooded with light from four LED tracks strategically positioned around the interior. Bright light finds its way to every corner, ensuring that you can quickly and easily locate the ingredients you need.

FLEX DIVIDER

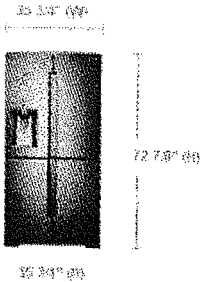

CRYSTAL GUARD

 Keep bottles organized and upright with the Flex Divider feature. The door storage bin has an adjustable partition that divides the space in two or keeps tall bottles secure.

The Crystal Guard system instantly showcases the food inside. Clear shelves and containers are made of a crystalline material that offers greater durability and a more modern design.

The Best Fridge we have ever owned

Where to begin, all our fresh produce lasts 1 week longer because of how well this fridge cools and maintains the temperature. Our meats don't get frost build up, AKA freezer burnt and ice cream and other frozen treats remain fresher. Carbonated water, filtered water, ice cubed/crushed. The Capacity is amazing, it's quiet and worth every penny. Thank you Samsung!!!!

Yes, I recommend this product.

This refrigerator is what should have been made many years ago. It is well thought out, bright inside and just perfect. After buying refrigerators for over 40 years this one is the best ever made for I can't tell you what a difference this makes. A little expensive but well worth it. Kudos to the designer.

Pros: High quality, Durable

Yes, I recommend this product.

Nice frldge until you have to get it serviced...

My wife really wanted this fridge. We have had it almost 2 years. We now have been without the fridge section since July 6th 2016. It is now 8/31/16. We have had 4 service people from different companies come and try to fix the issue. It is a "closed system issue" which is covered by Samsung. Finally got a repair team to come in to replace the compressor, only to find out that the control board was also fried. So, now we are waiting for that part to show up. Samsung was not very helpful, as their service software kept routing our request to the same company that showed up the second time (took 2 weeks of waiting to find this out), and said they could not work on it. We spoke to the Executive Customer Service department as well, and were promised a refund but that got denied (another 2 more weeks or waiting). Finally got a service company to replace the compressor, but was told that he had to replace to controller board as well, but that was nowhere to be found and had to be back ordered. So, we are still without a working fridge...

No, I do not recommend this product.

RH Top door not close properly. Technician visited, adjust door but again same issue. Door is heavy and not close properly as said by Samsung own technician.

Yes, I recommend this product.
