SAFETY PRECAUTIONS

Product Information

Important product information including the model and serial number are listed on the product rating plate. The rating plate is located on the bottom of the control panel assembly, at the far right, just above the oven door. Refer to the illustration below.

If service is necessary, contact Wolf factory certified service with the model and serial number. For the name of the nearest Wolf factory certified service or for questions regarding the installation, visit the contact & support section of our website, wolfappliance.com or call Wolf customer care at 800-222-7820.

Rating plate location.

IMPORTANT INSTRUCTIONS

▲ WARNING

A child or adult can tip this appliance and be killed.

Verify the anti-tip device has been properly installed and engaged. Ensure the anti-tip device is re-engaged when this appliance is moved. Refer to the illustrations below for how to verify correct installation.

To reduce the risk of burns, do not move this appliance while hot.

Do not operate this appliance without the anti-tip device in place and engaged. Failure to do so can result in death or serious burns to children or adults.

Anti-tip device location.

Anti-tip device engaged.

- This appliance is equipped with casters on two or more legs and must be installed on 1/8" (3) thick commercial grade vinyl composition floor finishing materials or equivalent.
- This appliance is not approved for downward air-flow ventilation or air curtain equivalent.
- A minimum 20" (508) riser is required when installing against a combustible surface.

INSTALLATION

Preparation

Before moving the range, protect any finished flooring and secure oven door(s) closed to prevent damage.

To lighten the load or to fit through a door way, the oven door(s) can be removed. Only remove if necessary. Do not remove griddle or any other component. Door removal should only be done by a certified installer or service technician.

For removal, a hinge pin will be inserted into the appropriate hinge shown in the illustrations below. The pin(s) are located inside the oven door. For single oven ranges, the hinge pin must be inserted in the right hinge. For double oven ranges, the pins must be placed in the outer two hinges.

⚠ CAUTION

Failure to insert the hinge pin in the appropriate hinge arm will cause damage to the range.

Single oven ranges.

Double oven ranges.

OVEN DOOR REMOVAL

- 1 Insert the hinge pin into the appropriate hinge.
- 2 Remove the lower kickplate assembly to access the lower hinge retainer mounting screws.
- 3 Open the oven door and remove both upper and lower hinge retainer mounting screws. The oven gasket may have to be moved slightly to access the bottom screws.
- 4 Move the hinge retainer plate forward slightly. The hinge retainer plate will remain on the door hinge after the mounting screws have been removed.
- 5 Carefully close the oven door to approximately 60°, then lift the door up and out. A slight rocking motion may be required for removal.

Oven door removal.

LOT 72

M J

OCT. 20.2016

INSTALLATION

Anti-Tip Bracket

To prevent the unit from tipping forward, the anti-tip bracket must be installed. To ensure the anti-tip bolt engages the bracket, position the bracket 3" (76) from the left side of the opening. Refer to the illustration below.

INSTALL BRACKET

Drywall application | After properly positioning the anti-tip bracket, mark holes, then use a Phillips screwdriver or a low rpm power drill to drive the wall anchor into the surface of the wallboard until flush. Pre-drill holes if needed. For hard wallboard or double-board construction, use a 1/4" drill bit. For solid plaster, use a 7/16" drill bit. Refer to the illustration below. Use #8 screws and flat washers to fasten the bracket to the wall.

Wood floor application | After properly positioning the anti-tip bracket, drill 3/16" (5) pilot holes through the floor. Use #12 screws and flat washers to secure the bracket to the floor.

Concrete floor application | After properly positioning the anti-tip bracket drill 3/8" (10) holes into the concrete a minimum of 1 1/2" (38) deep. Use 3/8" wedge anchors to secure the bracket to the floor.

ANTI-TIP BOLT ADJUSTMENT

Once the bracket is secure, adjust the anti-tip bolt so the top of the washer is 7/8" (22) maximum from the floor. Slide the range into the opening and verify the anti-tip bolt is engaged. Refer to the illustrations below.

Anti-tip bolt adjustment.

Anti-tip bolt engaged.

Anti-tip bracket location.

Wall anchor installation.

KitchenAid®
FOR THE WAY IT'S MADE.®

PRODUCT MODEL NUMBERS

KRSC500E KRSC503E
KRSC505E

Electrical: A 115 volt, 60 Hz, AC only, 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

Water: A cold water supply with water pressure of between 30 and 120 psi (207 and 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

Reverse Osmosis Water Supply:
IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa).
If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

Side by Side Refrigerator

PRODUCT DIMENSIONS

Handle and door style will vary with model.

Dimensions "C" and "D" include rollers extended 3/4" (1.9 cm).

Model	Model Size	Depth without Handle "A"	Depth with Handle "B"	Cabinet Height "C"	Overall Height "D"	Cabinet Width "E"	Depth "F" with Doors Open 90°
KRSC500E	22.5	27½" (69.9 cm)	29¾" (75.6 cm)	68½" (174.9 cm)	69" (175.3 cm)	35½" (90.2 cm)	45¾" (116.5 cm)
KRSC503E	23.9	27½" (69.9 cm)	30" (76.2 cm)	71" (180.3 cm)	71¼" (181 cm)	35¾" (90.8 cm)	45¾" (116.5 cm)
KRSF506E	25.6	32½" (81.6 cm)	34" (86.4 cm)	68½" (173.7 cm)	69" (175.3 cm)	35¾" (90.8 cm)	50½" (128.3 cm)

LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for ½" (1.27 cm) of space on each side and at the top. Allow for 1" (2.54 cm) of space behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave a 2" (5.08 cm) minimum space on each side (depending on your model) to allow the doors to swing open.

NOTES:

- This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.
- Normal minimum cabinet cut-out width required for product installation is 36" (91.44 cm). However, if the product is placed against an extended wall and the ability to remove the crisper pans is desired, an additional 18" (45.72 cm) of cabinet width is required, so a total cabinet opening width of 54" (137.16 cm) is recommended.
