HVI-2100 CERTIFIED RATINGS comply with new testing technologies and procedures prescribed by the Home Ventilating Institute, for off-the-shelf products, as they are available to consumers. Product performance is rated at 0.1 in. static pressure, based on tests conducted in a state-of-the-art test laboratory. Sones are a measure of humanly-perceived loudness, based on laboratory measurements.

EW56 SERIES WIRING

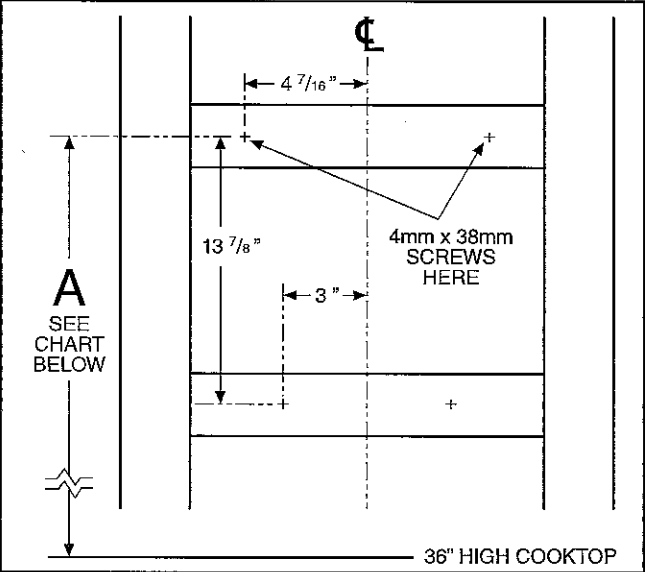

GROUNDING INSTRUCTIONS

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Position the electrical outlet within the space covered by the decorative flue and where it will not interfere with the round duct. Make sure the outlet is no further than 12" from the top of the hood chasis and that the outlet does not interfere with a mounting bracket fastening area or where the decorative flue touches the wall.

EW56 SERIES MOUNTING

1. Construct wood wall framing that is flush with interior surface of wall studs. Make sure the framing is centered over installation location.
- NOTE**
- Minimum hood distance above cooktop must not be less than 24". A maximum of 36" above the cooktop is highly recommended for best capture of cooking impurities. Distances over 36" are at the installer and user's discretion; and if ceiling height and flue length permit, 9-ft. to 10-ft. ceilings may require Flue Extension Model FXNE56SS, depending on installation heights (purchase separately). See chart below for additional installation height information.
2. After wall surface is finished, fasten (2) 4mm x 38mm screws at the locations shown above. DO NOT TIGHTEN screws all the way.
