# installation requirements

## LOCATION REQUIREMENTS

### Clearances and dimensions

 For OTR over Gas Stove, please follow local GAS CODE.

**BEFORE YOU BEGIN** to install this appliance, refer to the following information, dimensions, and clearances. **Do not locate the range where it may be subject to strong drafts.** Provide adequate clearances between the range and adjacent combustible surfaces. These dimensions must be met for safe use of the range. The location of the electrical outlet and gas piping may be adjusted to meet the following dimensions and clearances.

**For installation in Canada, a free-standing range is not to be installed closer than 4.7 in (12 cm) from any adjacent surface.**

 **CAUTION** This range has been designed to comply with the maximum allowable wood cabinet temperature of 194 °F (90 °C). Make sure the wall covering, countertops, and cabinets around the range can withstand the heat (up to 194 °F [90 °C]) generated by the range. If not, discoloration, delamination, or melting may occur.

**IMPORTANT: MAKE SURE** the unit is supported by the leveling legs and **NOT** by the cooktop itself.

## Minimum dimensions

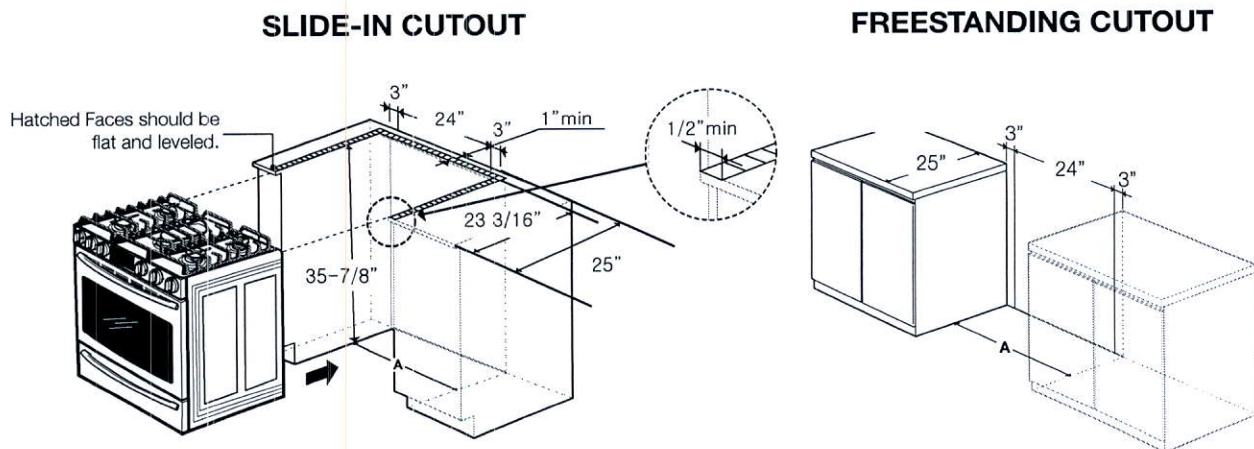

If overhead cabinets are provided, a range hood should also be provided that projects horizontally a minimum of 5 in (12.7 cm) beyond the front of the cabinets. This will dissipate any heat buildup in the overhead cabinets to prevent death, personal injury, and/or fire hazard. The ventilating hood must be constructed of sheet metal not less than 0.0122" thick. Install above the cooktop with a clearance of not less than 1/4" between the hood and the underside of the combustible material or metal cabinet. The hood must be at least as wide as the appliance and centered over the appliance. Clearance between the cooking surface and the ventilation hood surface must never be less than 24 inches.

**Exception 1 :** Installation of a listed microwave oven or cooking appliance over the cooktop shall conform to the installations packed with that appliance.

- 30-in (76.2-cm) minimum clearance between the top of the cooking surface and the bottom of an unprotected wood or metal cabinet; or If no 30-in (76.2-cm) minimum clearance, 24-in (61-cm) minimum when the bottom of the wood or metal cabinet is protected by not less than 0.25-in (0.64-cm) flame-retardant millboard covered with not less than no. 28 MSG sheet steel, 0.015-in (0.038-cm) stainless steel, 0.024-in (0.061-cm) aluminum, or 0.020-in (0.051-cm) copper.
- 18-in (45.7-cm) minimum between the countertop and the adjacent cabinet bottom.

**Exception 2 :** For island installation, maintain 2-1/2" minimum from cutout to back edge of countertop and 4" minimum from cutout to side edges of countertop.

## Installation guide

**A: Cabinet opening** 30" (76.2 cm)

**IMPORTANT:** If your cabinet have height over 36-4/5", this range cannot be installed without supporting unit like hard block.

## Recommended locations for gas piping and electrical outlets

(For models NX58H9950W\*, NX58H9500W\*, NX58K9500W\*)

**CAUTION** You must use the rear filler kit to install the range in a freestanding cutout cabinet. For more information, see "Optional rear filler kit" as shown below.

### Optional rear filler kit

**WARNING** Used to fill gap between the range back and wall. Adds a filler strip to the rear of the range. This kit can only be used when the opening in the countertop is 25" deep.

If the countertop depth is greater than 25", there will be a gap between the filler kit and the back wall.
