BERTAZZONI MASTER SERIES

36" 5 BURNER GAS OVEN RANGE - MAS36 5 GAS XE

FEATURES

Gas burners	5
Burner type	aluminium
Maintop	one piece stainless steel sheet
Burner controls	knobs
Knobs	soft touch
Grates	cast iron
Backguard	standard 4 inches
Gas safety device	thermocouple technology
One hand ignition	standard
Standard accessories	wok ring & simmer plate
Dual Power burner	750 - 18,000 Btu/h
Rapid burner	11,000 Btu/h
Semi-rapid burner	6500 Btu/h
Auxiliary burner	3400 Btu/h
Simmer rate	750 Btu/h
Main oven	gas convection with infrared broiler
Main oven functions	traditional bake, gas convection, broil, defrost/dehydrate
Main oven volume	4.4 ft³
Inner oven door	full-width triple glass
Oven equipment	1 baking tray, 2 standard wire shelves, 1 grill trivet for tray
Legs	height adjustable stainless steel legs

TECHNICAL SPECIFICATIONS

Voltage, frequency	120 V, 60Hz
Max Amp Usage, power rating	1.5 A - 150 W
Certification	CSA
Warranty	2 years parts and labor

INSTALLATION INSTRUCTIONS

Bertazzoni recommends to operate the appliance after it has been installed in a cabinet. The kitchen cabinets shall be made of materials capable of withstanding temperatures at least 117°F (65°C) above room temperature in order to avoid possible damage to the cabinets during oven usage. For further installation instructions refer to the installation manual.

Disclaimer: while every effort has been made to insure the accuracy of the information contained in this brochure, Fratelli Bertazzoni reserves the right to change any part of the information at any time without notice.

Available LPG version MAS36 5 GAS XE LP

MATCHING VENTILATION SOLUTIONS

Bertazzoni offers a variety of matching ventilation solutions for this range. Please check our website under the ventilation tab for a complete overview of all choices

36"

Cabinet Dimensions

Venting Requirements
(vented models only)

- Vent system must terminate to the outdoors except for non-vented (recirculating) installations.
- Do not terminate the vent system in an attic or other enclosed area.
- Do not use 4" (10.2 cm) laundry-type wall cap.
- Use metal vent only. Rigid metal vent is recommended. Plastic or metal foil vent is not recommended.
- The length of vent system and number of elbows should be kept to a minimum to provide efficient performance.

For the Most Efficient and Quiet Operation:

- Use no more than three 90° elbows.
- Make sure there is a minimum of 24" (61 cm) of straight vent between the elbows if more than 1 elbow is used.
- Do not install 2 elbows together.
- Use clamps to seal all joints in the vent system.
- The vent system must have a damper. If the roof or wall cap has a damper, do not use the damper supplied with the range hood.
- Use caulking to seal exterior wall or roof opening around the cap.
- The size of the vent should be uniform.

Cold Weather Installations

An additional backdraft damper should be installed to minimize backward cold air flow and a thermal break should be installed to minimize conduction of outside temperatures as part of the vent system. The damper should be on the cold air side of the thermal break.

The break should be as close as possible to where the vent system enters the heated portion of the house.

Makeup Air

Local building codes may require the use of makeup air systems when using ventilation systems greater than specified CFM of air movement. The specified CFM varies from locale to locale. Consult your HVAC professional for specific requirements in your area.

Venting Methods

This canopy hood is factory set for venting through the roof or wall.

A 6" (15.2 cm) round vent system is needed for installation (not included). The hood exhaust opening is 6" (15.2 cm) round.

NOTE: Flexible vent is not recommended. Flexible vent creates back pressure and air turbulence that greatly reduce performance.

Vent system can terminate either through the roof or wall. To vent through a wall, a 90° elbow is needed.

Rear Discharge

A 90° elbow may be installed immediately above the hood.

* For non-vented (recirculating) installations

IMPORTANT:

Minimum distance "X": 24" (61 cm)
from electric cooking surface

Minimum distance "X": 27" (68.6 cm)
from gas cooking surface

Suggested maximum distance "X": 36" (91.4 cm)

The chimneys can be adjusted for different ceiling heights. See the following chart.

Vented Installations

	Min. ceiling height	Max. ceiling height
Electric cooking surface	7' 5" (2.26 m)	9' 6" (2.9 m)
Gas cooking surface	7' 8" (2.34 m)	9' 6" (2.9 m)

Non-Vented (Recirculating) Installations

	Min. ceiling height	Max. ceiling height
Electric cooking surface	7' 5" (2.26 m)	9' 10" (3 m)
Gas cooking surface	7' 8" (2.34 m)	9' 10" (3 m)

NOTE: The range hood chimneys are adjustable and designed to meet varying ceiling or soffit heights depending on the distance "X" between the bottom of the range hood and the cooking surface. For higher ceilings, a Stainless Steel Chimney Extension Kit Part Number EXTKIT25FS is available from your dealer or an authorized parts distributor. The chimney extension replaces the upper chimney shipped with the range hood.
