14 INSTALLATION

Installing the Range

Unpacking and Moving the Range

A CAUTION

- You should use two or more people to move and install the range. (Excessive Weight Hazard) Failure to do so can result in back or other injury.
- Do not use the door handles to push or pull the range during installation or when moving the range out for cleaning or service. Doing so can result in serious damage to the door of the range.

Remove packing material, protective film, tape and any temporary labels from your range before using. Do not remove any warning-type labels, the model and serial number label, or the Tech Sheet that is located on the back of the range.

To remove any remaining tape or glue, rub the area briskly with your thumb. Tape or glue residue can also be easily removed by rubbing a small amount of liquid dish soap over the adhesive with your fingers. Wipe with warm water and dry.

Do not use sharp instruments, rubbing alcohol, flammable fluids, or abrasive cleaners to remove tape or glue. These products can damage the surface of your range.

Your range is heavy and can be installed on soft floor coverings such as cushioned vinyl or carpeting. Use care when moving the range on this type of flooring. Use a belt when moving the range to prevent damaging the floor. Or slide the range onto cardboard or plywood to avoid damaging the floor covering.

Choosing the Proper Location

Do not locate your range where it may be subject to strong drafts. Any openings in the floor or wall behind the range should be sealed. Make sure the openings around the base of the range that supply fresh air for combustion and ventilation are not blocked by carpeting or woodwork.

Your range, like many other household units, is heavy and can be installed on soft floor coverings such as cushioned vinyl or carpeting. Use care when moving the range on this type of flooring.

This appliance must not be installed with a ventilation system that blows air downward toward the range. This type of ventilation system may cause ignition and combustion problems with the gas cooking appliance resulting in personal injury or unintended operation.

When the floor covering ends at the front of the range, the area that the range will be installed on should be built up with plywood to the same level or higher than the floor covering. This will allow the range to be moved for cleaning and servicing, as well as provide proper air flow to the range.

Also, make sure the floor covering can resist temperatures of at least 167 °F (75 °C). See the Installation Safety Precautions included in this manual.

Make sure the wall coverings around your range can resist the heat generated up to 194 °F (90 °C) by the range. See the Precautions Safety Precautions included in this manual

Gas Pipe and Electrical Outlet Locations

Dimensions and Clearances

Provide proper clearance between the range and adjacent combustible surfaces. These dimensions must be met for safe use of your range. The location of the electrical outlet and pipe opening (see Gas Pipe and Electrical Outlet Locations, page 14) may be adjusted to meet specific requirements. The range may be placed with 0" clearance (flush) at the back wall.

36" Counter-Depth 3-Door Refrigerator

800 Series - Stainless Steel B36CT80SNS

B36CT80SNS Stainless Steel

Also available in: Black Stainless Steel B36CT80SNB

Introducing the revolutionary, new FarmFresh System™, with four freshness technologies designed to work together to keep your food fresher, longer. Enjoy less food waste, new innovative features and more thoughtful design.

Features & Benefits

VitaFreshPro™ provides pre-programmed freshness settings to optimize temperature and humidity to keep meat, fish, and produce fresher, longer.

Interior Water Dispenser is thoughtfully placed inside for refreshing water at the touch of a button or a push of a nozzle.

FlexBar™ utilizes typically unused space in the upper refrigerator cavity.
