# INSTALLATION REQUIREMENTS

## Tools and Parts

### IMPORTANT:

- Installer: Leave Installation Instructions with the homeowner.
- Homeowner: Keep Installation Instructions for future reference. Save these Installation Instructions for the local electrical inspector's use.

### Tools Needed

Gather the required tools and parts before starting installation. Read and follow the instructions provided with any tools listed here.

- |                                   |                         |
|-----------------------------------|-------------------------|
| ■ Cordless drill                  | ■ Torx®†T27 screwdriver |
| ■ Drill bits                      | ■ 11/32" nut driver     |
| ■ Adjustable wrenches (2)         | ■ Appliance dolly       |
| ■ Phillips screwdriver            | ■ 5/32" hex key         |
| ■ Small level                     | ■ Utility knife         |
| ■ 3/8" and 1/2" open-end wrenches | ■ Tape measure          |
| ■ 1/4" and 5/16" socket drivers   |                         |

### Parts Needed

- #8 x 3" (7.6 cm) wood screws (longer screws may be needed) (6)
- 2" x 4" x 32" (5 cm x 10 cm x 81 cm) wood board(s) (1 or 2)
- Make custom panels or consult a qualified cabinetmaker or carpenter to make the panels.  
Overlay Series: Make custom panels, or consult a qualified cabinetmaker or carpenter to make the panels. See "Overlay Series Custom Panels and Handle Kits" for more information. Stainless is shipped complete.
- If you are connecting the water line directly to copper tubing and not to a shutoff valve, you need a ferrule, a union, and a 1/4" (6.35 mm) compression fitting.

## Location Requirements

**⚠WARNING**

**Explosion Hazard**

Keep flammable materials and vapors, such as gasoline, away from appliance.

Use nonflammable cleaner.

Failure to do so can result in death, explosion, or fire.

**IMPORTANT:** This refrigerator is designed for indoor, household use only.

This appliance is intended to be used in household and similar applications such as:

- Staff kitchen areas in shops, offices and other working environments.
- Farm houses and by clients in hotels, motels and other residential type environments.
- Bed and breakfast type environments.
- Catering and similar non-retail applications.
- Observe all governing codes and ordinances.
- It is recommended that you do not install near an oven, radiator, or other heat source.
- Do not install in a location where the temperature will fall below 55°F (13°C).
- Floor must support the refrigerator weight, more than 600 lbs (272 kg), door panels and contents of the refrigerator. Flooring under refrigerator must be at same level as the room. Face of cabinetry must be plumb.
- Ceiling height must allow for side tipping radius. See "Tipping Radius."
- Location should permit door to open fully. See "Door Swing Dimensions."
- Location must permit top grille removal. See "Opening Dimensions."

### Opening Dimensions

- To avoid tipping during use, the solid soffit must be within 1" (2.5 cm) maximum above the refrigerator. If the solid soffit is higher than 1" (2.5 cm) or one is not available, then the refrigerator must be braced.  
If anti-tip boards are needed, they must be installed to the rear wall studs so that the bottom of the anti-tip board is 84" (213.4 cm) from the floor. See "Install Anti-Tip Boards" for more information.

### IMPORTANT

- **NOTES:**
  - A clearance of 1/2" (1.3 cm) must be maintained above the top grille in order for the top grille to be removed.
  - Do not remove the foam gasket from the top of the compressor cover unless removal is necessary to fit the unit under a soffit. Removal of the gasket will cause loss in cooling efficiency.
  - If installing under a solid soffit, after, installation raise the leveling legs so that the gasket is pressed snugly against the soffit.

A. Gasket  
B. Compressor cover

- A grounded 3 prong electrical outlet should be located within a specified number of inches from the right-hand side cabinets or end panel. See the chart following the graphic for the number of inches required for your model. For more information, see "Electrical Requirements."

†TORX is a trademark of Acument Intellectual Properties, LLC.

- The water shutoff should be located in the base cabinet on either side of the refrigerator or some other easily accessible area. If the water shutoff valve is not in the cabinets, the plumbing for the water line can come through the floor. See "Water Supply Requirements" for more information.

Model	Width A (as shown above)	Dimension B (as shown above)
42	41 1/2" to 41 3/4" (105.4 cm to 106.1 cm)	7 1/2" (19.1 cm)

**NOTE:** Flooring under appliance must be at same level as the room. Face of cabinetry must be plumbed.

Installation Type	Depth C (as shown above)
Standard Flush (new installation)	25" (63.5 cm) minimum
Retrofit Installations	24" (60.9 cm) minimum

**NOTE:** On retrofit installations, door panels will not be flush with adjacent cabinets.

## Electrical Requirements

### Electrical Shock Hazard

**Plug into a grounded 3 prong outlet.**

**Do not remove ground prong.**

**Do not use an adapter.**

**Do not use an extension cord.**

**Failure to follow these instructions can result in death, fire, or electrical shock.**

Before you move your refrigerator into its final location, it is important to make sure you have the proper electrical connection.

If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person. Do not use a cord that shows cracks or abrasion damage along its length or at either the plug or connector end.

### Recommended Grounding Method

A 115 V, 60 Hz AC only 15 A or 20 A fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator and approved accessories be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

**IMPORTANT:** If this product is connected to a GFCI (Ground Fault Circuit Interrupter) protected outlet, nuisance tripping of the power supply may occur, resulting in loss of cooling. Food quality and flavor may be affected. If nuisance tripping has occurred, and if the condition of the food appears poor, dispose of the food.

**NOTE:** Before performing any type of installation or cleaning, remove the top grille and turn the master power switch to OFF or disconnect power at the circuit breaker box. When you are finished, turn ON the master power switch or reconnect power at the circuit breaker box. Then reset the control to the desired setting.

## Water Supply Requirements

### IMPORTANT:

- All installations must meet local plumbing code requirements.
- Connect to potable water supply only .
- There is not enough clearance to achieve a flush installation if a water shutoff valve is located in the wall behind the refrigerator.
- The water shutoff should be located in the base cabinet on either side of the refrigerator or some other easily accessible area. The right-hand side is recommended. The access hole through the cabinet must be within 1/2" (1.3 cm) of the rear

**NOTE:** If the water shutoff valve is in the back wall behind the refrigerator, it must be at an angle so that the tube is not kinked when the refrigerator is pushed into its final location.

- If the water shutoff valve is not in the cabinets, the plumbing for the water line can come through the floor. A 1/2" (12.7 mm) hole for plumbing should be drilled at least 6" (15.2 cm) from the right-hand or left-hand side cabinet or panel. On the floor, the hole should be no more than 1" (2.54 cm) away from the back wall. See "Connect the Water Supply."
- If additional tubing is needed, use copper tubing and check for leaks. Install the copper tubing only in areas where the household temperatures will remain above freezing.
- If additional tubing is needed, use copper tubing and check for leaks. Install the copper tubing only in areas where the household temperatures will remain above freezing.
- Do not use a piercing-type or 3/16" (4.76 mm) saddle valve which reduces water flow and also clogs more easily.  
**NOTE:** Your refrigerator dealer has a kit available with a 1/4" (6.35 mm) saddle-type shutoff valve, a union, and copper tubing. Before purchasing, make sure a saddle-type valve complies with your local plumbing codes.

**Water Pressure**

A cold water supply with water pressure between 30 psi and 120 psi (207 kPa and 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

**NOTE:** If the water pressure is less than what is required, the flow of water from the water dispenser could decrease or ice cubes could be hollow or irregular shaped. If you have questions about your water pressure, call a licensed, qualified plumber.

**Reverse Osmosis Water Supply**

**IMPORTANT:** The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 psi and 120 psi (207 kPa and 827 kPa).

If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 psi to 60 psi (276 kPa to 414 kPa).

If the water pressure to the reverse osmosis system is less than 40 psi to 60 psi (276 kPa to 414 kPa):

- Check to see whether the sediment filter in the reverse osmosis system is blocked. Replace the filter if necessary.
- Allow the storage tank on the reverse osmosis system to refill after heavy usage.
- If your refrigerator has a water filter, it may further reduce the water pressure when used in conjunction with a reverse osmosis system. Remove the water filter cartridge.

If you have questions about your water pressure, call a licensed, qualified plumber.

**Tipping Radius**

Be sure there is adequate ceiling height to stand the refrigerator upright when it is moved into place.

- Be sure there is adequate ceiling height to stand the refrigerator upright when it is moved into place.
- If needed, the tipping radius can be reduced. See "Reduce Tipping Radius."

**Side Tipping Radius**

The side tipping radius varies depending upon the width of the model. Use the chart provided to determine the side tipping radius.

**NOTE:** Tip on side only.

Model	Tipping Radius
42	93" (236.2 cm)

**Product Dimensions**

**Front View**

- Width dimensions were measured from trim edge to trim edge.
- Height dimensions are shown with leveling legs extended 1/8" (3 mm) below the rollers.

Description		Inches	cm
A	Width of FC door		
	42"	17 <sup>1</sup> / <sub>2</sub>	44.4
B	Width of RC door		
	42"	23	59.7
C	Space between doors	1/4	0.65
D	Overall width with band		
	42"	42 <sup>3</sup> / <sub>16</sub>	107.2
F	Height of door handles	39 <sup>1</sup> / <sub>16</sub>	99.3
E	Height to top of door handles	60 <sup>9</sup> / <sub>16</sub>	153.8
G	Height of doors	70 <sup>15</sup> / <sub>16</sub>	180.2
H	Height of grille	3 <sup>9</sup> / <sub>16</sub>	9.0
I	Height to bottom of the dispenser	38 <sup>5</sup> / <sub>16</sub>	97.3
J	Width of Dispenser	9 <sup>3</sup> / <sub>16</sub>	23.3
K	Height of Dispenser	7 <sup>11</sup> / <sub>16</sub>	19.5
L	Water line location distance from side	17 <sup>3</sup> / <sub>4</sub>	45.0
M	Water line location distance from front	3 <sup>1</sup> / <sub>4</sub>	8.2
N	Height of grille (top)	8 <sup>7</sup> / <sub>8</sub>	22.6
O	To bottom of solid soffit (minimum & maximum)	83 <sup>1</sup> / <sub>2</sub>	212.1
		84 <sup>5</sup> / <sub>8</sub>	215

When leveling legs are fully extended to 1¼" (3.2 cm) below rollers, add 1⅝" (2.9 cm) to the height dimensions.

Side View

- The depth from the front of the top grille to the back of the refrigerator cabinet is 25⅝" (64.5 cm).
- The power cord is 84" (213 cm) long.
- Height dimensions are shown with leveling legs extended 1/8" (3 mm) below the rollers.

Description		Inches	cm
A	Total height	83 <sup>3</sup> / <sub>8</sub>	211.8
B	Height to top of doors	74 <sup>1</sup> / <sub>2</sub>	189.2

Interior dimensions	Width		Height	
	Inches	cm	Inches	cm
Refrigerator Compartment				
42"	20 <sup>13</sup> / <sub>16</sub>	52.9	67 <sup>1</sup> / <sub>16</sub>	170.4
Freezer Compartment				
42"	14 <sup>5</sup> / <sub>16</sub>	36.4	66 <sup>3</sup> / <sub>4</sub>	169.6

When leveling legs are fully extended to 1¼" (3.2 cm) below rollers, add 1⅝" (2.9 cm) to the height dimensions.

Door Swing Dimensions

The location must permit both doors to open to a minimum of 90°. Allow 5" (12.7 cm) minimum space between the side of the refrigerator and a corner wall.

**NOTE:** More clearance may be required if you are using overlay panels, custom handles, or extended handles on a Classic model.  
To adjust the door swing, see "Adjust Doors."

	Description	Inches	cm
A	Width from FC side of refrigerator to handle - door fully open 130°	11 <sup>5</sup> / <sub>8</sub>	29.5
B	Width from FC side of refrigerator to handle - door fully open 110°	7 <sup>5</sup> / <sub>8</sub>	19.3
C	Width from FC side of refrigerator to handle - door open 90°	2 <sup>11</sup> / <sub>16</sub>	6.8

KitchenAid® 36" 6-Burner Commercial-Style Gas  
Rangetop

<http://www.kitchenaid.com>

Key Features:

- Two 20,000 BTU Ultra Power™ Dual-Flame Burners
- Three-Level Convertible Grates
- 5,000 BTU Simmer & Melt Burner
- Three 15,000 BTU Burners

Product Dimensions:

- Height: 7 7/16
- Width: 35 3/4
- Depth: 27 7/8

Electrical Requirements:

- 15. 120V.

Additional Information:

## Parts Supplied

Check that all parts are included.

- Burner grates
- Burner caps
- Griddle drip tray (on griddle models)

## Parts Needed

- All models must be installed with a backguard if installing at zero clearance to a combustible back wall surface such as drywall. See "Cabinet Dimensions" in the "Location Requirements" section for installation requirements.

Check local codes and consult gas supplier. Check existing gas supply and electrical supply. See the "Electrical Requirements" and "Gas Supply Requirements" sections.

It is recommended that all electrical connections be made by a licensed, qualified electrical installer.

## Location Requirements

**IMPORTANT:** Observe all governing codes and ordinances. Do not obstruct flow of combustion and ventilation air.

- It is the installer's responsibility to comply with installation clearances specified on the model/serial/rating plate. The model/serial/rating plate is located under the console on the right-hand side.
- It is recommended that a 585 CFM (993.9 m<sup>3</sup>/hr) or larger range hood be installed above the cooktop.
- Follow the range hood or microwave hood combination installation instructions for dimensional clearances above the cooktop surface.
- Recessed installations must provide complete enclosure of the sides and rear of the cooktop.
- All openings in the wall or floor where cooktop is to be installed must be sealed.
- Do not seal the cooktop to the side cabinets.
- Cabinet opening dimensions that are shown must be used. Given dimensions are minimum clearances.
- Grounded electrical supply is required. See the "Electrical Requirements" section.
- Proper gas supply connection must be available. See the "Gas Supply Requirements" section.

**IMPORTANT:** To avoid damage to your cabinets, check with your builder or cabinet supplier to make sure that the materials used will not discolor, delaminate, or sustain other damage. This oven has been designed in accordance with the requirements of UL and CSA International and complies with the maximum allowable wood cabinet temperatures of 194°F (90°C).

## Mobile Home - Additional Installation Requirements

The installation of this cooktop must conform to the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 (formerly the Federal Standard for Mobile Home Construction and Safety, Title 24, HUD Part 280). When such standard is not applicable, use the Standard for Manufactured Home Installations, ANSI A225.1/NFPA 501A or local codes.

In Canada, the installation of this cooktop must conform with the current standards CAN/CSA-A240-latest edition or with local codes.

## Product Dimensions

**NOTE:** Cooktop features may differ.

### 36" (91.4 cm) models

- A. 27<sup>7</sup>/<sub>8</sub>" (70.8 cm)
- B. 35<sup>3</sup>/<sub>4</sub>" (90.8 cm)

- C. 3 prong grounding-type power supply cord
- D. Model/serial/rating plate (located on the underside of the cooktop burner base)

### Side View of Cooktop

- A. 29<sup>3</sup>/<sub>8</sub>" (74.6 cm)
- B. 1<sup>1</sup>/<sub>4</sub>" (3.2 cm)
- C. Island trim or optional backguard
- D. 7<sup>1</sup>/<sub>16</sub>" (18.8 cm)

- E. Gas inlet is located 1<sup>7</sup>/<sub>8</sub>" (4.8 cm) from the back of the cooktop burner base and 4<sup>7</sup>/<sub>8</sub>" (12.4 cm) in from left-hand side of the cooktop burner base.
- F. 22" (55.9 cm)
- G. 3<sup>5</sup>/<sub>8</sub>" (9.2 cm)

Gas and Electric Connection Locations

- A. Grounded 3 prong outlet should be located on left-hand side of the cutout 16" (40.6 cm) max. from enclosure sidewall
  - B. 10" (25.4 cm) min. clearance from countertop to top of the outlet
  - C. 14" (35.6 cm) countertop to the gas supply line
  - D. Gas supply line should be located in this area on rear or side walls or the supply line can come up through the floor.
- NOTE:** Solid side and bottom of cutout enclosure not shown.

Cabinet Requirements

**IMPORTANT:** If installing a range hood, hood liner, or microwave hood combination above the cooking surface, follow the range hood or microwave hood combination installation instructions for dimensional clearances above the cooktop surface.

- A. See chart.
- B. See chart.
- C. See chart.
- D. See chart.
- E. See chart.
- F. 18" (45.7 cm) min. clearance upper cabinet to countertop
- G. 3/4" (19 mm) back of cabinet cutout to gas opening cutout
- H. 6 7/8" (16.1 cm) gas opening cutout depth
- I. 12 1/2" (31.7 cm) gas opening cutout width
- J. 22 1/4" (56.5 cm) cabinet cutout depth
- K. 2" (5.1 cm) cabinet side to gas cutout
- L. 12" (30.4 cm) min. distance on both sides of the cooktop to the side wall or other combustible material above cooking surface
- M. 24" (61.0 cm) cabinet depth
- N. 7 1/4" (18.4 cm) cabinet depth to countertop
- O. Notch to be equal on both sides
- P. 13" (33.0 cm) upper cabinet depth

Size	A* Cooktop Cutout to Back Wall	B** Cooktop to Cabinet	C Optional Backguard and Upper Cabinet Opening	D Cabinet and Countertop	E Countertop Only
36" (91.4 cm)	1 3/4" (4.4 cm)*	58" (147.3 cm)	36" (91.4 cm)	35 1/4" (89.5 cm)	35 3/4" (90.8 cm) for zero clearance

**\*NOTE:** If back wall is constructed of a combustible material and a backguard is not installed, a minimum clearance of dimension A + 6" (15.2 cm) is required for all models.

If installing a range hood, hood liner, or microwave hood combination above the cooktop, follow the range hood, hood liner or microwave hood combination installation instructions for dimensional clearances above the cooktop surface.

**\*\*If not using ventilation, Minimum Clearances**

36" (91.4 cm) models: 58" (147.3 cm) minimum clearance between the top of the cooking platform and the bottom of a combustible surface.

**NOTE:** Due to manufacturing factory tolerances, these are nominal dimensions. You may need to readjust to meet your clearance.

## KitchenAid Model: KOEC530PPS

KitchenAid® 30" Combination Microwave Wall Ovens with Air Fry Mode.

Color  PrintShield Stainless

### Product Description

Get the crisp you crave, right from your oven. KitchenAid® Combination Microwave Wall Ovens with Air Fry Mode circulate hot air around the included basket to cook with less oil.\* Microwave convection cooking turns the microwave into a second oven for small batch bakes like cookies, madeleines and cakes.<br /><br />\*When compared to deep frying.

DIMENSION GUIDE

Flush Installation

A 25" (63.5 cm) minimum cutout depth is required.

These dimensions will result in a 1/4" (6 mm) reveal on the top, a 1/4" (6 mm) reveal on the sides, and a 1/8" (3 mm) reveal on the bottom of the wall oven.

The front face of the cleats and platform will be visible and should be treated as a finished surface.

- 30" (76.2 cm) models**
- A. 5/8" (1.6 cm) top cleat\*
  - B. 30 1/4" (76.8 cm) minimum width of flush inset cutout
  - C. 28 7/8" (73.3 cm) minimum width of opening
  - D. 43" (109.2 cm) minimum height of flush inset cutout
  - E. 42 1/2" (107.9 cm) recommended cutout height
  - F. 11/16" (1.7 cm) side cleat\*
  - G. 1/4" (0.6 cm) spacer the entire depth of the cutout\*
  - H. Recommended junction box location
  - I. 4 5/8"-19 1/4" (11.7 cm-48.9 cm) bottom of cutout to floor
  - J. 25" (63.5 cm) minimum depth of cutout

\*Cleats and spacers must be recessed 1 3/8" (3.5 cm) from the front of the cabinet.

TOP VIEW

- 30" (76.2 cm) models**
- A. 2" (5.1 cm) spacer the entire depth of the cutout\*
  - B. 25" (63.5 cm) depth of cutout
  - C. 1 3/8" (3.5 cm) recess from front of cabinet
  - D. 11/16" (1.7 cm) side cleat\*
- \*Cleats and spacers must be recessed 1 3/8" (3.5 cm) from the front of the cabinet.

Electrical Requirements

**⚠ WARNING**

**Electrical Shock Hazard**

**Plug into a grounded 3 prong outlet.**

**Do not remove ground prong.**

**Do not use an adapter.**

**Do not use an extension cord.**

**Failure to follow these instructions can result in death, fire, or electrical shock.**

If codes permit and a separate ground wire is used, it is recommended that a qualified electrical installer determine that the ground path and the wire gauge are in accordance with local codes.

Check with a qualified electrical installer if you are not sure the oven is properly grounded.

This oven must be connected to a grounded metal, permanent wiring system.

Be sure that the electrical connection and wire size are adequate and in conformance with the National Electrical Code, ANSI/NFPA 70-latest edition or CSA Standards C22.1-94, Canadian Electrical Code, Part 1 and C22.2 No. O-M91-latest edition, and all local codes and ordinances.

## DIMENSION GUIDE

4 of 12

A copy of the above code standards can be obtained from:

National Fire Protection Association  
1 Batterymarch Park  
Quincy, MA 02169-7471

CSA International  
8501 East Pleasant Valley Road  
Cleveland, OH 44131-5575.

### Electrical Connection

To properly install your oven, you must determine the type of electrical connection you will be using and follow the instructions provided for it here.

- Oven must be connected to the proper electrical voltage and frequency as specified on the model/serial/rating plate. The model/serial/rating plate is located under the control panel on single ovens and under the control panel on the upper oven cavity on double ovens. See the following illustration.

A. Model/serial/rating plate

- Models rated from 7.3 to 9.6 kW at 240 V (5.4 to 7.4 kW at 208 V) require a separate 40 A circuit. Models rated at 4.8 kW and below at 240 V (3.6 kW and below at 208 V) require a separate 20 A circuit.
- A circuit breaker is recommended.
- Connect directly to the fused disconnect (or circuit breaker box) through flexible, armored or nonmetallic sheathed, copper cable (with grounding wire). See the "Make Electrical Connection" section in the Owner's Manual.
- Flexible conduit from the oven should be connected directly to the junction box.
- Fuse both sides of the line.
- Do not cut the conduit. The length of conduit provided is for serviceability of the oven.
- A UL listed or CSA-approved conduit connector must be provided.

- If the house has aluminum wiring, follow the procedure below:

Connect the aluminum wiring using special connectors and/or tools designed and UL listed for joining copper to aluminum.

Follow the electrical connector manufacturer's recommended procedure. Aluminum/copper connection must conform with local codes and industry-accepted wiring practices.

Be sure that the electrical connection and wire size are adequate and in conformance with the National Electrical Code, ANSI/NFPA 70-latest edition or CSA Standards C22.1-94, Canadian Electrical Code, Part 1 and C22.2 No. 0-M91-latest edition, and all local codes and ordinances.

## Undercounter Dishwasher

### PRODUCT MODEL NUMBERS

KDTF324PPA

KDTF924PPS

KDTF924PPA

### DRAIN REQUIREMENTS

- A new drain hose is supplied with your dishwasher. If drain hose is not long enough, use a drain hose extension with a maximum length of 12 ft (3.7 m).
- Make sure to connect drain hose to waste tee or disposer inlet above drain trap in house plumbing and 20" (508 mm) minimum above the floor. It is recommended that the drain hose either be looped up and securely fastened to the underside of the counter or be connected to an air gap.

**IMPORTANT:** This product is not equipped with a high loop on the side of the dishwasher. The installer is responsible for adding a high loop in the adjacent cabinet. A high loop is required if the dishwasher will drain into a floor drain. This prevents water draw off from the dishwasher during operation. When the drain is connected to a sink drain, counter-top air-gap or disposer, the high loop is generally not required. An check valve internal to the drain prevents back-flow into the dishwasher.

- Make sure to use an air gap if the drain hose is connected to house plumbing lower than 20" (508 mm) above subfloor or floor.

- If required, the air gap should be installed in accordance with the air gap installation instructions. When you are connecting the air gap, a rubber hose (not provided) will be needed to connect to the waste tee or disposer inlet.
- Use 1/2" (13 mm) minimum I.D. drain line fittings.

### WATER SUPPLY REQUIREMENTS

- This dishwasher maybe fitted with a smart inlet hose with a water cut off valve. Do not cut the water inlet hose for any reason, to install, adapt or shorten.
- This dishwasher has a water heating feature and also requires a connection to a hot water supply line.
- A hot water line with 20 psi to 120 psi (138 kPa to 862 kPa) water pressure can be verified by a licensed plumber.
- 120°F (49°C) water at dishwasher.
- 3/8" (95 mm) O.D. copper tubing with compression fitting or flexible braided water supply line.

- Included water inlet hose with Leak Detection System for some models.
- Included 3/8" (9.5 mm) Compression x 3/4" (19 mm) Water inlet adapter (only for models with Leak Detection System).
- If installed in new construction, make sure the house water supply lines have been flushed prior to connecting the dishwasher to remove any debris that may exist in the supply line.

### ELECTRICAL REQUIREMENTS

Be sure that the electrical connection and wire size are adequate and in conformance with the National Electrical Code, ANSI/NFPA 70 - latest edition, and all local codes and ordinances.

For a fee, a copy of the above code standards can be obtained from:

National Fire Protection Association  
1 Batterymarch Park  
Quincy, MA 02169-7471

#### You Must Have:

- 120 V, 60 Hz, AC only, 15 A or 20 A, fused electrical supply.
- Copper wire only.
- A maximum of 2 field wiring supply conductors (12 AWG largest size) plus 1 grounding conductor are permitted in the terminal box.

#### We Recommend:

- Install the dishwasher on a circuit with appropriate interrupte per your local code. The dishwasher is compatible with tim delay fuses, standard circuit breakers, and GFCI and AFCI circuit breakers.

#### Circuit Requirement:

- The dishwasher may be installed on the same circuit as a garbage disposal providing that the branch circuit cannot exceed rated circuit load and must comply with all governing codes and regulations such as but not limited to National Electrical Code, ANSI/NFPA 70 - latest edition.
- No electrical connections other than the dishwasher power and ground connections can be made inside of the dishwasher junction box.

#### If Connecting Dishwasher with a Power Cord:

- Use UL Listed power cord kit marked for use with dishwasher. See the "Tools and Parts" section at the front of the Owner's manual for part details and orders.
- Plug into a grounded 3 prong outlet. Outlet must meet all local codes and ordinances.

#### If Connecting Dishwasher with Direct Wiring:

- Use flexible, armored, or nonmetallic sheathed copper wire with grounding wire that meets the wiring requirements for your home and local codes and ordinances.
- Use only the supplied plastic cable fittings for flexible and non-metallic sheathed wiring (Romex, etc.). Do not use metallic strain reliefs for these wire constructions.
- Use a UL-listed/CSA-approved metallic strain relief for armored cable installations (21 mm diameter), Using the strain relief's manufacturer installations instructions.

Because Whirlpool Corporation policy includes a continuous commitment to improve our products, we reserve the right to change materials and specifications without notice.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.
