## SCB930 ALITO Collection

\*SCB51930\*

### Features

- Wall mount range hood
- 6" round duct adapter
- Non-stick aluminum fan blades
- 3 speed push button control
- 2 LED lights (2 x 1.4W)
- Dishwasher-safe mesh or baffle filters
- Standard chimney fits up to 9 ft. ceiling
- Up to 9 minute time-delay OFF feature
- Plug-in connection

### Options

- Filters: SC500 - Quick Release Aluminum Mesh Filters  
SCB500 - Quick Release Stainless Steel Baffle Filters
- Available Chimney Flues:  
Short (7 ft. - 8 ft. A1.CH10)  
Standard (8 ft. - 9 ft. A1.CH18)  
Extended (9 ft. - 11 ft. A1.CH30)
- Widths: 24", 30", 36"

### Specifications

- Air Flow Volume: 550 CFM
- Electrical Connection: 120V/60Hz
- Power Consumption: 210 Watts
- Current: 2.5 Amps
- Fan Speed: 1600RPM
- Fan Type: Centrifugal Blower

- Finishes: Stainless Steel
- Ducting: 6" Round
- Dimensions: Width: 24" 30" 36"  
Height: 46"  
Depth: 18"

- Noise Level: Min. 2 Sones  
Max. 6 Sones

Whirlpool® Top Mount Refrigerator

PRODUCT MODEL NUMBERS

WRT311FZD  
WRT511SZD  
WRT541SZD

PRODUCT DIMENSIONS

**Electrical:** A 115-volt, 60-Hz, AC-only, 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

**NOTE:** Before performing any type of installation, cleaning, or removing a light bulb, turn the control (Thermostat, Refrigerator or Freezer Control depending on the model) to OFF and then disconnect the refrigerator from the electrical source. When you are finished, reconnect the refrigerator to the electrical source and reset the control (Thermostat, Refrigerator or Freezer Control depending on the model) to the desired setting. See "Using the Controls."

**Water:** A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa) is required to operate ice maker and water dispenser. If you have questions about your water pressure, call a licensed, qualified plumber.

**IMPORTANT:** The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa).

**Reverse Osmosis Water Supply:** If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

Model Number	Model Size	Reversible Door	Height - Overall "A"	Height - Top of Cabinet "B"	Depth - Door Open 90° "C"	Depth - With Handles "D"	Depth - Without Handles "E"	Depth - Cabinet Only "F"	Width - Cabinet "G"
WRT311FZD	20.5 cu. ft.	Yes	66 1/4" (168.3 cm)	65 1/2" (166.4 cm)	62 1/4" (158.1 cm)	32 1/4" (83.5 cm)	30 5/8" (77.8 cm)	28 1/2" (72.4 cm)	32 3/4" (83.2 cm)
WRT511SZD WRT541SZD	21.3 cu. ft.	Yes	66 1/4" (168.3 cm)	65 1/2" (166.4 cm)	62 1/4" (158.1 cm)	34" (86.4 cm)	32 1/2" (82.3 cm)	28 1/2" (72.4 cm)	32 3/4" (83.2 cm)

LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for a 1/2" (1.25 cm) space on each and between overhead cabinets and refrigerator top. Allow at least 1" (2.5 cm) between back of cabinet and the wall. If your refrigerator has an ice maker, make sure you leave some extra space at the back for the water line connections.

If you are installing your refrigerator next to a fixed wall, leave 2" (5 cm) minimum on the hinge side (depending on your model) to allow for the door to swing open.

**NOTE:** This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

Because Whirlpool Corporation policy includes a continuous commitment to improve, our products, we reserve the right to change materials and specifications without notice.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

## FEATURING

### TimeSaver™ system

The TimeSaver™ system's Frozen Bake Technology allows you to skip preheating for favorites like pizza, lasagna, chicken nuggets, fries or pies so you can cook frozen foods faster.\*

### HeatRight™ system

The HeatRight™ system's True convection helps you to cook food faster with a rear fan and third heating element to circulate hot air over, under, and around food

### CompleteClean™ system

The CompleteClean™ system's EZ-2-Lit™ hinged grates give you quick access to spills on the cooktop. The industry first hinged design allows you to wipe up under them without removing them entirely. For a more thorough clean, the grates are also dishwasher-safe.

### PRODUCT DIMENSIONS

This manual covers several models. Your model may appear different from the model's depicted. Dimensions given are approximate and subject to change without notice.

- A. 35 1/2" (903 mm) height from floor to top of oven door
- B. 20 1/2" (519 mm) depth
- C. 24 1/2" (619 mm) width
- D. 36 1/2" (927 mm) height from floor to top of cooktop
- E. 24 1/2" (619 mm) width from handle to back of range
- F. 24 1/2" (619 mm) width from handle to back of range

**IMPORTANT:** Range must be level after installation. Follow the instructions in the "Level Range" section. Using the leveling legs at the rear of the range is not recommended.  
\* Range can be leveled across the top (1/8" only) by adjusting the leveling legs.

### Type of Gas

#### Natural gas:

W. This range is factory set for use with natural gas. See "Gas Conversions" section. The model shown is a factory set for use with natural gas. The burner orifice is set for use with natural gas. The burner orifice is set for use with natural gas. The burner orifice is set for use with natural gas.

#### LP gas conversion:

Conversion must be done by a qualified service technician. No attempt should be made to convert the appliance from the gas specified on the model nameplate. (Using plate for use with a different gas without consulting the service gas supplier. See "Gas Conversions" section.)

### CABINET OPENING DIMENSIONS

**IMPORTANT:** A minimum clearance of 1/8" (3 mm) is required between the range and the cabinet. The range must be installed in a cabinet opening that is at least 24 1/2" (619 mm) wide. The range must be installed in a cabinet opening that is at least 24 1/2" (619 mm) wide. The range must be installed in a cabinet opening that is at least 24 1/2" (619 mm) wide.

- A. 24 1/2" (619 mm) width from handle to back of range
- B. 24 1/2" (619 mm) width from handle to back of range
- C. 24 1/2" (619 mm) width from handle to back of range
- D. 24 1/2" (619 mm) width from handle to back of range
- E. 24 1/2" (619 mm) width from handle to back of range
- F. 24 1/2" (619 mm) width from handle to back of range
- G. 24 1/2" (619 mm) width from handle to back of range
- H. 24 1/2" (619 mm) width from handle to back of range
- I. 24 1/2" (619 mm) width from handle to back of range
- J. 24 1/2" (619 mm) width from handle to back of range
- K. 24 1/2" (619 mm) width from handle to back of range

\* NOTE: 24 1/2" (619 mm) minimum when cabinet is 24 1/2" (619 mm) wide. The range must be installed in a cabinet opening that is at least 24 1/2" (619 mm) wide. The range must be installed in a cabinet opening that is at least 24 1/2" (619 mm) wide. The range must be installed in a cabinet opening that is at least 24 1/2" (619 mm) wide.

WEG780H0D

WEG745H0F

## GAS SUPPLY REQUIREMENTS

### Gas supply line:

- Provide a gas supply line of 3/4" (1.9 cm) rigid pipe to the range location. A smaller size pipe on longer runs may result in insufficient gas supply. With LP gas, piping or tubing size can be 1/2" (1.3 cm) minimum. Usually, LP gas suppliers determine the size and materials used in the system.

NOTE: Pipe-joint compounds that resist the action of LP gas must be used. Do not use TEFLON® tape.

### Flexible metal appliance connector:

- If local codes permit, a new CSA design-certified, 4 to 5 ft (122 to 152.4 cm) long, 1/2" (1.3 cm) or 3/4" (1.9 cm) I.D., flexible metal appliance connector may be used for connecting range to the gas supply line.

- A 1/2" (1.3 cm) male pipe thread is needed for connection to the female pipe-threads of the inlet to the appliance pressure regulator.
- Do not kink or damage the flexible metal tubing when moving the range.
- Must include a shutoff valve:  
The supply line must be equipped with a manual shutoff valve. This valve should be located in the same room but external to the range opening, such as an adjacent cabinet. It should be in a location that allows ease of opening and closing. Do not block access to shutoff valve. The valve is for turning on or shutting off gas to the range.

A. Gas supply line  
B. Shutoff valve "open" position  
C. To range

## Gas Pressure Regulator

The gas pressure regulator supplied with this range must be used. The inlet pressure to the regulator should be as follows for proper operation:

### Natural gas:

Minimum pressure: 5" WCP  
Maximum pressure: 14" WCP

### LP gas:

Minimum pressure: 11" WCP  
Maximum pressure: 14" WCP

Contact local gas supplier if you are not sure about the inlet pressure.

## PRODUCT DIMENSIONS

This manual covers several models. Your model may appear different from the models depicted. Dimensions given are maximum dimensions across all models.

- A. 1 1/8" (3.0 cm) height from cooktop to top of vent
- B. 29 7/8" (75.9 cm)
- C. Model/serial number plate (located behind the oven door on the top right-hand side of the oven frame)
- D. 36" (91.4 cm) height to top of cooktop edge with leveling legs screwed all the way in\*
- E. 28 1/8" (71.9 cm) max. depth from front of console to back of range.
- F. 28 3/8" (73.3 cm) max. depth from handle to back of range.

**IMPORTANT:** Range must be level after installation. Follow the instructions in the "Level Range" section. Using the cooktop as a reference for leveling the range is not recommended.

\* Range can be raised approximately 1" (2.5 cm) by adjusting the leveling legs.

## Type of Gas

### Natural gas:

- This range is factory set for use with Natural gas. See "Gas Conversions" section. The model/serial rating plate located behind the control panel has information on the types of gas that can be used. If the types of gas listed do not include the type of gas available, check with the local gas supplier.

### LP gas conversion:

Conversion must be done by a qualified service technician. No attempt shall be made to convert the appliance from the gas specified on the model/serial rating plate for use with a different gas without consulting the serving gas supplier. See "Gas Conversions" section.

**Electrical Requirements:** 120-volt, 60-Hz, AC only, 15- or 20-amp. fused electrical supply. Copper wire only. A time delay fuse or circuit breaker and separate circuit is recommended.

**If direct wiring dishwasher:** Use flexible, armored, or nonmetallic, sheathed copper wire with grounding wire that meets the wiring requirements for your home and local codes and ordinances. Use a UL listed or CSA approved conduit connector.

**If connecting dishwasher with a power supply cord:**

Use Power Supply Cord Kit (Part No. 4317824) marked for use with dishwashers. Follow the kit instructions for installing the power supply cord.

Power supply cord must plug into a grounded 3 prong, outlet, located in the cabinet next to the dishwasher opening. Outlet must meet all local codes and ordinances.

**Water Supply Requirements:** A hot water line with 20 to 120 psi (138 to 862 kPa) water pressure. Water temperature must be 120°F (49°C) water at dishwasher. Use 3/8" O.D. copper tubing with compression fitting or flexible braided water supply line (1/2" minimum plastic tubing is not recommended). Use a 90° elbow with 3/4" N.P.T. external pipe threads on one end. Do not solder within 6" (15.2 cm) from water inlet valve.

**Drain Requirements:** A new drain hose is supplied with your dishwasher. If this is not long enough, use a new drain hose with a maximum length of 12' (3.7 m) (Part No. 3385556) that meets all current AHAM/IAPMO test standards, is resistant to heat and detergent, and fits the 1" (2.5 cm) drain connector of the dishwasher.

Make sure to connect the drain hose to waste tee or disposer inlet above drain trap in house plumbing and 20" (50.8 cm) minimum above the floor. It is recommended

that the drain hose either be looped up and securely fastened to the underside of the counter or be connected to an air gap.

Make sure to use an air gap if the drain hose is connected to house plumbing lower than 20" (50.8 cm) above subfloor or floor.

Use 1/2" (1.3 cm) minimum I.D. drain line fittings.

If required, the air gap should be installed in accordance with the air gap installation instructions. When connecting the air gap, a rubber hose (not provided) will be needed to connect to the waste tee or disposer inlet.

## LOCATION REQUIREMENTS

Proper installation is your responsibility.

### You will need:

- A water heater set to 120°F (49°C).
- A grounded electrical outlet located within 6 ft (1.8 m) of power cord on back of washer.
- Hot and cold water faucets located within 4 ft (1.2 m) of hot and cold water fill valves on washer, and water pressure of 20–100 psi (137.9–689.6 kPa).
- A level floor with maximum slope of 1" (25 mm) under entire washer. Installing on carpet or surfaces with foam backing is not recommended.
- Floor must support washer's total weight (with water and load) of 315 lbs (143 kgs).

**IMPORTANT:** Do not install, store, or operate washer where it will be exposed to weather or in temperatures below 32°F (0°C). Water remaining in washer after use may cause damage in low temperatures. See "Washer Care" in your Use and Care Guide for winterizing information.

### Whirlpool Models\*

\*For additional details (or information) specific to your model, refer to the 'Dimensions' listed for your model at [www.whirlpool.com](http://www.whirlpool.com).

### Maytag Models

All dimensions show minimum spacing allowed. For each arrangement, consider allowing more space for ease of installation and servicing, and spacing for companion appliances and clearances for walls, doors, and floor moldings.

Space must be large enough to allow door to fully open. Add spacing of 1" (25 mm) on all sides of washer to reduce noise transfer. If a closet door or louvered door is installed, top and bottom air openings in door are required.

### Recessed area or closet installation (stacked washer and dryer):

WHIRLPOOL WASHER Model #: WFW5620HW

Custom under-counter installation:

DRAIN SYSTEM

The drain system can be installed using a floor drain, wall standpipe, floor standpipe, or laundry tub. Select the method you need.

**IMPORTANT:** To avoid siphoning, only 4.5" (114 mm) of drain hose should be inside standpipe. Always secure drain hose with cable tie.

Floor standpipe drain system

Minimum diameter for a standpipe drain: 2" (51 mm). Minimum carry-away capacity: 17 gal. (64 L) per minute. A 1/4" (6 mm) diameter to 1" (25 mm) diameter Standpipe Adapter Kit is available (Part Number 3363920). Top of standpipe must be at least 30" (762 mm) high; install no higher than 96" (2.44 m) from bottom of washer. If you have an overhead sewer and need to pump higher than 96" (2.44 m), a sump pump and associated hardware are needed. See "Alternate parts."

Wall standpipe drain system

See requirements for floor standpipe drain system.

Laundry tub drain system

Minimum capacity: 20 gal. (76 L). Top of laundry tub must be at least 30" (762 mm) above floor; install no higher than 96" (2.44 m) from bottom of washer.

Recessed area or closet installation:

Back view:

**NOTE:** Most installations require a minimum of 5" (127 mm) clearance behind dryer for exhaust vent with elbow. See "Venting Requirements."

#### Installation Clearances

For each arrangement, consider allowing more space for ease of installation and servicing, spacing for companion appliances, and clearances for walls, doors, and floor moldings. Space must be large enough to allow door to fully open. Add spacing on all sides of dryer to reduce noise transfer. If a closet door or louvered door is installed, top and bottom air openings in door are required.

Check code requirements. Some codes limit, or do not permit, installation of the dryer in garages, closets, mobile homes, or sleeping quarters. Contact your local building inspector.

**NOTE:** No other fuel-burning appliance can be installed in the same closet as a dryer.

#### Installation spacing for recessed area or closet installation

All dimensions show recommended and minimum spacing allowed.

- Additional spacing should be considered for ease of installation and servicing.
- Additional clearances might be required for wall, door, floor moldings, dryer venting, and gas line.
- Additional spacing should be considered on all sides of the dryer to reduce noise transfer.
- For closet installation with a door, minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.
- Companion appliance spacing should also be considered.

#### Recommended installation clearances (dryer only):

0" (0 mm) rear spacing is allowed for straight back venting only. For steam models only, inlet hose must not be kinked.

#### Custom under-counter installation:

#### Mobile home - Additional installation requirements:

This dryer is suitable for mobile home installations. The installation must conform to the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 (formerly the Federal Standard for Mobile home construction and Safety, Title 24, HUD Part 280) or Standard CAN/CSA-Z240 MH.

#### Mobile home installations require:

- Metal exhaust system hardware, available for purchase from your dealer. For further information, see "Assistance or Service" in your Use and Care Guide.
- Special provisions must be made in mobile homes to introduce outside air into dryer. Openings (such as a nearby window) should be at least twice as large as dryer exhaust opening.

#### For mobile home installation of gas dryers:

- Mobile Home Installation Hold-down Kit Part Number 346764 is available to order. For further information, see "Assistance or Service" in your Use and Care Guide.

Additional parts may be required, depending on your installation. Check local codes. Check existing electrical supply and venting. Read "Electrical Requirements" and "Venting Requirements" before purchasing parts.

## If using a power supply cord:

Use a UL Listed power supply cord kit marked for use with clothes dryers. The kit should contain:

- A UL Listed 30 amp power supply cord, rated 120/240 volt minimum. The cord should be type SRD or SRDT and be at least 4 ft. (1.22 m) long. The wires that connect to the dryer must end in ring terminals or spade terminals with upturned ends.
- A UL Listed strain relief.

## Optional Equipment (not supplied with dryer):

Refer to your Use and Care Guide for information about accessories available for your dryer.

## LOCATION REQUIREMENTS

Check code requirements. Some codes limit, or do not permit, installing dryer in garages, closets, mobile homes, or sleeping quarters. Contact your local building inspector.

**⚠ WARNING**

**Explosion Hazard**

Keep flammable materials and vapors, such as gasoline, away from dryer.

Place dryer at least 18 inches (460 mm) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

### You will need:

- A location allowing for proper exhaust installation. See "Venting Requirements."
- A separate 15 or 20 amp circuit for a gas dryer or 30 amp circuit for an electric dryer.
- If using power supply cord, a grounded electrical outlet located within 2 ft. (610 mm) of either side of dryer. See "Electrical Requirements."
- Floor must support dryer weight of 200 lbs. (90.7 kg). Also consider weight of companion appliance.
- Cold water faucets located within 4 ft. (1.2 m) of the water fill valves, and water pressure of 20–120 psi (138–827 kPa). You may use your washer's water supply by purchasing the necessary parts noted in "Parts needed."
- Level floor with maximum slope of 1" (25 mm) under entire dryer. If slope is greater than 1" (25 mm), install Extended Dryer Feet Kit, Part Number 279810. If not level, clothes may not tumble properly and automatic sensor cycles may not operate correctly.
- For garage installation, place dryer at least 18" (460 mm) above floor. If using a pedestal, you will need 18" (460 mm) to bottom of dryer.
- The dryer must not be installed or stored in an area where it will be exposed to water and/or weather.

**IMPORTANT:** Do not operate, install, or store dryer where it will be exposed to water, weather, or at temperatures below 40°F (4°C). Lower temperatures may cause dryer not to shut off at end of automatic sensor cycles, resulting in longer drying times.
