MOEN®

There is more than 1 version of this model.
Page down to identify the version you have.

FAUCET DESCRIPTION

- Reflex™ pulldown system offers smooth operation, easy movement and secure docking
- Power Clean™ spray technology
- Metal construction with various finishes identified by suffix
- Duralock™ connect installation
- Pulldown spray with 68" braided hose
- Flexible supply lines with 3/8" compression fittings
- High arc spout provides height and reach to fill or clean large pots while pulldown wand provides the maneuverability for cleaning or rinsing
- 360° rotating spout
- Faucet designed for handle to be mounted on right side only

OPERATION

- Lever style handle
- Temperature controlled by 100° arc of handle travel
- Operates with less than 5 lbs. of force
- Operates in stream or spray mode in the pullout or retracted position

FLOW

- Flow is limited to 1.5 gpm (5.7 L/min) max at 60 psi

CARTRIDGE

- 1255™ Duralast™ cartridge

STANDARDS

- Third party certified to IAPMO Green, ASME A112.18.1/CSA B125.1 and all applicable requirements therein including NSF 61/9G & 372
- Meets CalGreen and Georgia SB370 requirements
- Complies with California Proposition 65 and with the Federal Safe Drinking Water Act
- The backflow protection system in the device consists of two independently operating check valves, a primary and a secondary which prevent backflow

- ADA  for lever handle

WARRANTY

- Lifetime limited warranty against leaks, drips and finish defects to the original homeowner
 - 10 year limited warranty when used in a multifamily installation
 - 5 year limited warranty when used in a commercial installation
- Visit www.moen.com/support for complete details and limitations

DESCRIPTION

- Metal construction with various finishes identified by suffix
- Flexible supplies with 3/8" compression fittings
- Includes metal or 50/50 pop-up type waste assembly where noted

OPERATION

- Pivot action lever style handle
- Temperature controlled through 100° degree arc of handle travel

FLOW

- Water usage is limited to these maximum flow rates as indicated by the corresponding product markings
 - ° 1.2 gpm max (4.5L/min) at 60 psi
 - ° 1.5 gpm max (5.7L/min) at 60 psi

CARTRIDGE

- 1255™ Duralast™ cartridge
- Nonmetallic/nonferrous and stainless steel material

STANDARDS

- Third party certified to WaterSense®, ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- Certified to NSF 61/9 & 372
- Products marked with 1.2 gpm are compliant with California water efficiency regulations
- Complies with California Proposition 65 and with the Federal Safe Drinking Water Act
- ADA  for lever handle

WARRANTY

- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

DESCRIPTION

- Metal construction with various finishes identified by suffix
- Includes non-metallic showerhead, arm, flange and non-metallic diverter tub spout

OPERATION

- Handle operates counterclockwise through a 270° arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3°

FLOW

- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi
- NH suffix models contain no showerhead

CARTRIDGE

- 1222 cartridge design
- Accommodates back to back installations
- Nonmetallic/nonferrous and stainless steel material

STANDARDS

- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are third party certified to WaterSense®
- ADA ♿ for lever handle

WARRANTY

Whirlpool® Top Mount Refrigerator

PRODUCT MODEL NUMBERS

WRT311FZD WRT541SZD
WRT511SZD

Electrical: A 115-volt, 60-Hz, AC-only, 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

NOTE: Before performing any type of installation, cleaning, or removing a light bulb, turn the control (Thermostat, Refrigerator or Freezer Control depending on the model) to OFF and then disconnect the refrigerator from the electrical source. When you are finished, reconnect the refrigerator to the electrical source and reset the control (Thermostat, Refrigerator or Freezer Control depending on the model) to the desired setting. See "Using the Controls."

Water: A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa) is required to operate ice maker and water dispenser. If you have questions about your water pressure, call a licensed, qualified plumber.

IMPORTANT: The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa).

Reverse Osmosis Water Supply: If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

PRODUCT DIMENSIONS

Model Number	Model Size	Reversible Door	Height - Overall "A"	Height - Top of Cabinet "B"	Depth - Door Open 90° "C"	Depth - With Handles "D"	Depth - Without Handles "E"	Depth - Cabinet Only "F"	Width - Cabinet "G"
WRT311FZD	20.5 cu. ft.	Yes	66¼" (168.3 cm)	65½" (166.4 cm)	62¼" (158.1 cm)	32¾" (83.5 cm)	30¾" (77.8 cm)	28½" (72.4 cm)	32¾" (83.2 cm)
WRT511SZD WRT541SZD	21.3 cu. ft.	Yes	66¼" (168.3 cm)	65½" (166.4 cm)	62¼" (158.1 cm)	34" (86.4 cm)	32½" (82.3 cm)	28½" (72.4 cm)	32¾" (83.2 cm)

LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for a ½" (1.25 cm) space on each and between overhead cabinets and refrigerator top. Allow at least 1" (2.5 cm) between back of cabinet and the wall. If your refrigerator has an ice maker, make sure you leave some extra space at the back for the water line connections.

If you are installing your refrigerator next to a fixed wall, leave 2" (5 cm) minimum on the hinge side (depending on your model) to allow for the door to swing open.

NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

Top Features

FlexHeat™ Dual Radiant Element
Get two elements in one with a 6" inner ring that's great for smaller pots and pans and a 9" expandable outer ring that makes room for larger cookware.

Frozen Bake™ technology
Skip preheating and cook frozen favorites like pizza in fewer steps with preprogrammed settings that automatically adjust cooking times for you.

Keep Warm setting
Keep dishes from getting cold with this setting that delivers low heat to the oven.

Closed Door Broiling
Maintain the optimal cooking temperature for food while still keeping the kitchen comfortable and cool using this broiling temperature management system that helps prevent overheating.

WHIRLPOOL 30" (76.0 CM) FREESTANDING ELECTRIC RANGES
 Model YWFE515S0JS

Product Dimensions

- A. 27³/₄" (70.5 cm) max. depth with handle
- B. 46⁷/₈" (119.1 cm) overall height (max.) with leveling legs screwed all the way in*
- C. 36" (91.4 cm) cooktop height (max.) with leveling legs screwed all the way in*
- D. 29⁷/₈" (75.9 cm) width
- E. 25⁵/₁₆" (64.3 cm) depth - back of range to front of cooktop**
- F. Model/serial/rating plate (located on the frame behind a top corner of the door or either side of the drawer)

IMPORTANT: Range must be level after installation. Follow the instructions in the "Level Range" section. Using the cooktop as a reference for leveling the range is not recommended.

*Range can be raised approximately 1" (2.5 cm) by adjusting the leveling legs.

**Front of door and drawer may extend further forward depending on styling.

Cabinet Dimensions

Cabinet opening dimensions shown are for 25" (64.0 cm) countertop depth, 24" (61.0 cm) base cabinet depth and 36" (91.4 cm) countertop height.

IMPORTANT: If installing a range hood or microwave hood combination above the cooking surface, follow the range hood or microwave hood combination installation instructions for dimensional clearances above the cooktop surface.

A freestanding range may be installed next to combustible walls with zero clearance.

- A. 13" (33.0 cm) max. upper cabinet depth
- B. 30" (76.2 cm) min. opening width
- C. For minimum clearance to top of cooktop, see NOTE*
- D. 30" (76.2 cm) min. opening width
- E. Outlet - 8" (20.3 cm) to 22" (55.9 cm) from either cabinet, 7" (17.8 cm) max. from floor.
- F. Cabinet door or hinges should not extend into the cutout.

***NOTE:** 24" (61.0 cm) minimum when bottom of wood or metal cabinet is covered by not less than 1/4" (6.4 mm) flame retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015" (0.4 mm) stainless steel, 0.024" (0.6 mm) aluminum or 0.020" (0.5 mm) copper.
 30" (76.2 cm) minimum clearance between the top of the cooking platform and the bottom of an uncovered wood or metal cabinet.

WHIRLPOOL 30" (76.0 CM) FREESTANDING ELECTRIC RANGES
Model YWFE515S0JS

Electrical Requirements - Canada Only

⚠ WARNING

Electrical Shock Hazard

Electrically ground range.

Failure to do so can result in death, fire, or electrical shock.

If codes permit and a separate ground wire is used, it is recommended that a qualified electrical installer determine that the ground path is adequate and wire gauge are in accordance with local codes.

Be sure that the electrical connection and wire size are adequate and in conformance with CSA Standard C22.1, Canadian Electrical Code, Part 1 - latest edition, and all local codes and ordinances.

A copy of the above code standards can be obtained from:

Canadian Standards Association
178 Rexdale Blvd.
Toronto, ON M9W 1R3 CANADA

- Check with a qualified electrical installer if you are not sure the range is properly grounded.

Range Rating*		Specified Rating of Power Supply Cord Kit and Circuit Protection
120/240 V	120/208 V	Amps
8.8 - 16.5 KW	7.8 - 12.5 KW	40 or 50**
16.6 - 22.5 KW	12.6 - 18.5 KW	50

*The NEC calculated load is less than the total connected load listed on the model/serial/rating plate.

**If connecting to a 50 A circuit, use a 50 A rated cord with kit. For 50 A rated cord kits, use kits that specify use with a nominal 1³/₈" (3.5 cm) diameter connection opening.

- A time-delay fuse or circuit breaker is recommended.
- This range is equipped with a CSA International Certified Power Cord intended to be plugged into a standard 14-50R wall receptacle. Be sure the wall receptacle is within reach of range's final location.

- Do not use an extension cord.

INSTALLATION INSTRUCTIONS

Unpack Range

⚠ WARNING

Excessive Weight Hazard

Use two or more people to move and install range.

Failure to do so can result in back or other injury.

- Remove shipping materials, tape and film from range.
- Remove oven racks and parts package from inside oven.
- Do not remove the shipping base at this time.

A. Shipping base

4. On Ranges Equipped with a Storage Drawer:
- Remove the storage drawer. See the "Storage Drawer" section. Use a 1/4" (6.4 mm) drive ratchet to lower the rear leveling legs one-half turn. Use a wrench or pliers to lower front leveling legs one-half turn.

A. 1/4" (6.4 mm) drive ratchet
B. Rear leveling leg
C. Wrench or pliers
D. Front leveling leg

On Ranges Equipped with a Warming Drawer or Premium Storage Drawer:

On ranges equipped with a warming drawer or premium storage drawer, the rear legs cannot be accessed by removing the warming drawer or premium storage drawer. It will be necessary to adjust the rear legs from outside the range. Use wrench or pliers to lower the front and rear leveling legs one half turn.

A. Rear leveling leg
B. Wrench or pliers
C. Front leveling leg

Install Anti-Tip Bracket

WARNING

Tip Over Hazard

A child or adult can tip the range and be killed.
Install anti-tip bracket to floor or wall per installation instructions.

Slide range back so rear range foot is engaged in the slot of the anti-tip bracket.

Re-engage anti-tip bracket if range is moved.

Do not operate range without anti-tip bracket installed and engaged.

Failure to follow these instructions can result in death or serious burns to children and adults.

1. Remove the anti-tip bracket from where it is taped inside the storage drawer or warming drawer.
2. Determine which mounting method to use: floor or wall.
If you have a stone or masonry floor, you can use the wall mounting method. If you are installing the range in a mobile home, you must secure the range to the floor.
3. Determine and mark centerline of the cutout space. The mounting can be installed on either the left-side or right-side of the cutout. Position mounting bracket against the wall in the cutout so that the V-notch of the bracket is $12\frac{9}{16}$ " (31.9 cm) from centerline as shown.

A. $12\frac{9}{16}$ " (31.9 cm)
B. Bracket V-notch

4. Drill two $\frac{1}{8}$ " (3 mm) holes that correspond to the bracket holes of the determined mounting method. See the following illustrations.

Floor Mounting

Wall Mounting

5. Using the Phillips screwdriver, mount anti-tip bracket to the wall or floor with the two #12 x $1\frac{5}{8}$ " (4.1 cm) screws provided.
6. Move range close enough to opening to allow for final electrical connections. Remove shipping base, cardboard or hardboard from under range.
7. Move range into its final location, making sure rear leveling leg slides into anti-tip bracket.

8. Move range forward onto shipping base, cardboard or hardboard to continue installing the range using the following installation instructions.

DRAIN REQUIREMENTS

- A new drain hose is supplied with your dishwasher. If drain hose is not long enough, use a new drain hose with a maximum length of 12 ft (3.7 m) that meets all current AHAM/ IAPMO test standards, is resistant to heat and detergent, and fits the 1" (25 mm) drain connector of the dishwasher. See the "Tools and Parts" section at the front of the guide for part details and orders.
- Make sure to connect drain hose to waste tee or disposer inlet above drain trap in house plumbing and 20" (508 mm) minimum above the floor. It is recommended that the drain hose either be looped up and securely fastened to the underside of the counter or be connected to an air gap.
- Make sure to use an air gap if the drain hose is connected to house plumbing lower than 20" (508 mm) above subfloor or floor.

- If required, the air gap should be installed in accordance with the air gap installation instructions. When you are connecting the air gap, a rubber hose (not provided) will be needed to connect to the waste tee or disposer inlet.
- Use 1/2" minimum I.D. drain line fittings.

WATER SUPPLY REQUIREMENTS

- This dishwasher has a water heating feature and also requires a connection to a hot water supply line.
- A hot water line with 20 to 120 psi (138 to 862 kPa) water pressure can be verified by a licensed plumber.
- 120°F (49°C) water at dishwasher
- 3/8" O.D. copper tubing with compression fitting or flexible braided water supply line. See the "Tools and Parts" section at the front of the guide for part details and orders.

NOTE: 1/2" minimum plastic tubing is not recommended.

- A 90° elbow with 3/4" hose connection with rubber washer. See the "Tools and Parts" section at the front of the guide for part details and orders.
- Do not solder within 6" (152 mm) of the water inlet valve.
- If installed in new construction, make sure the house water supply lines have been flushed prior to connecting the dishwasher to remove any debris that may exist in the supply line.

NOTE: If replacing an existing dishwasher, it is recommended to install a new water line (see the "Tools and Parts" section at the front of the guide for part details) and drain hose (supplied) with the new dishwasher.

ELECTRICAL REQUIREMENTS

You Must Have:

- 120-volt, 60 Hz, AC-only, 15- or 20-amp, fused electrical supply
- Copper wire only
- A maximum of 2 field wiring supply conductors (12 AWG largest size) plus 1 grounding conductor are permitted in the terminal box.

We Recommend:

- A time-delay fuse or circuit breaker
- A separate circuit

If Connecting Dishwasher with a Power Cord:

- Use a UL Listed power cord kit marked for use with dishwasher. See the "Tools and Parts" section at the front of the guide for part details and orders.
- Plug into a grounded 3 prong outlet. Outlet must meet all local codes and ordinances.

If Connecting Dishwasher with Direct Wiring:

- Use flexible, armored, or nonmetallic sheathed copper wire with grounding wire that meets the wiring requirements for your home and local codes and ordinances.
- Use a UL Listed/CSA Approved metallic strain relief.

PRODUCT AND CABINET OPENING DIMENSIONS

For 4" (100 mm) toe kick, height of cabinet opening is 34 1/2" (863 mm).

- A. Insulation may be compressed (not used on all models).
- B. Door handles may protrude forward of the face of the dishwasher, (varies by model).

Check that all surfaces have no protrusions that would prohibit dishwasher installation.

- C. Measured from the lowest point on the underside of the countertop. May be reduced to 33 1/2" (851 mm) by removing the wheels and perforated area of insulation (blanket) on dishwasher.
- D. Minimum, measured from narrowest point of opening.

STACK KIT SAFETY

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.
This symbol alerts you to potential hazards that can kill or hurt you and others.
All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING."
These words mean:

**DANGER**

You can be killed or seriously injured if you don't immediately follow instructions.

**WARNING**

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

INSTALLATION REQUIREMENTS

TOOLS AND PARTS

Gather the required tools and parts before starting installation.

Tools needed:

#2 Phillips screwdriver

Adjustable wrench that
opens to 2" (51 mm)

Pliers or slip-joint pliers
(for drain and inlet hoses)

Level

Bucket

Tape measure

41 of 44

UK 3 WALLACETON
LOT 3183A-3

THE GRASSFIELD

Parts supplied:

Hooked brackets (2)

Plastic clips (2)

Feet (4)

Pan-head screws (4)

LOCATION REQUIREMENTS

Recessed Area and Closet Installation Instructions

IMPORTANT: The stacked washer/dryer can be installed in an enclosure. Check the locations of the water supply faucets, grounded electrical outlets, and gas supply line connection (gas dryer only). Depending on your application, longer washer fill hoses, longer electric power supply cords, and a longer flexible stainless steel gas connector line than that supplied with the washer/dryer may be needed.

If the water supply faucets, electrical outlets, gas supply line, or power cord need modification, have a qualified plumber, electrician, or gas technician make the changes.

Mobile home – Additional installation requirements

This dryer is suitable for mobile home installations. The installation must conform to the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 (formerly the Federal Standard for Mobile Home Construction and Safety, Title 24, HUD Part 280) or the Canadian Manufactured Home Standard CAN/CSA-Z240 MH.

Mobile home installations require special parts (listed following), which are available for purchase from your local dealer or service center.

Stacked pair must be securely fastened to the floor.

Parts Needed:

- Mobile Home Installation Kit, Part Number 346764, needs to be purchased to accomplish this. Order 2 kits to enable you to secure both the front and the back of the unit to the floor.
- Metal exhaust system hardware.

Special provisions must be made in mobile homes to introduce outside air into the dryer. The opening (such as a nearby window) should be at least twice as large as the dryer exhaust opening.

The exhaust vent must be securely fastened to a noncombustible portion of the mobile home structure and must not terminate beneath the mobile home. Terminate the exhaust vent outside.

UNINSTALL WASHER AND DRYER

IMPORTANT: If your washer and dryer are already installed, they must be uninstalled.
If you need to uninstall your washer or dryer, see the Installation Instructions that came with your model for tools required.

WARNING

Excessive Weight Hazard

Use two or more people to move washer or dryer.
Failure to do so can result in back or other injury.

Uninstalling Your Washer

1. Turn off the hot and cold water faucets.
2. Unplug the power supply cord.
3. Slowly loosen the fill hoses at the faucets to relieve the water pressure. Use a sponge or towel to absorb the released water.
4. Remove the "HOT" and "COLD" fill hoses from the back of the washer. Drain water in the hoses into a bucket.
5. Remove the drain hose from the wall drain pipe or utility sink and drain any water in the hose into a bucket.

Uninstalling Your Electric Dryer

1. Unplug the power supply cord.
2. Pull the dryer away from the wall enough to loosen the vent clamp. Loosen the clamp and gently remove the exhaust vent from the dryer exhaust outlet.

Steam Models Only:

3. Turn off water faucet.
4. Disconnect the water inlet hose from faucet, then drain the hose into a bucket.

Uninstalling Your Gas Dryer

1. Unplug the power supply cord.
2. Turn off the gas supply.
3. Pull the dryer away from the wall enough to loosen the vent clamp. Loosen the clamp and gently remove the exhaust vent from the dryer exhaust outlet.
4. Disconnect the flexible gas supply line from the dryer. Put a piece of tape over the open ends of the gas line connection fittings.

Steam Models Only:

5. Turn off water faucet.
6. Disconnect the water inlet hose from faucet, then drain the hose into a bucket.

IF YOUR WASHER OR DRYER IS STILL IN ITS PACKAGING

WARNING

Excessive Weight Hazard

Use two or more people to move washer or dryer.
Failure to do so can result in back or other injury.

Position the packaged washer or dryer close to its final position. Cut the packaging as follows:

- Washer: Cut plastic film along dotted cut line around the base. Remove the packaging. Do not remove the shipping bolts.
- Dryer: Cut around top and down corners along dotted cut lines. Discard carton top, corner posts, and sides. Leave carton bottom underneath dryer.

INSTALLATION INSTRUCTIONS

WARNING

Excessive Weight Hazard

Use two or more people to move washer or dryer.

Failure to do so can result in back or other injury.

1. Move washer to its final location

Leave room to work behind washer. Do not remove the shipping bolts.

2. Check levelness of washer

Place a level on top edges of washer, checking each side and front. If not level, tip washer and adjust feet up or down as shown in Installation Instructions, repeating as necessary.

Not Level

LEVEL

Not Level

3. On covering, lay dryer on side or back

Place a covering, such as cardboard or a blanket, on the floor to avoid damage. Gently lay the dryer down with its side or back on the covering.

4. Remove existing feet, if present

Using a wrench or slip-joint pliers, remove the existing feet if present.

44 of 44

UK 3 WALLACETON
LOT 3183A-3
20-1606 ELEV B
THE GRASSFIELD

Using a wrench or slip-joint pliers, install the new feet, turning them fully into the bottom of the dryer.

Lift the dryer back to an upright position, keeping it on the cardboard (or carton bottom). Use the cardboard to slide the dryer to the front of the washer to avoid damaging the rubber feet.

Lift the dryer up and set securely on top of washer. Position dryer to slightly overhang the back of the washer – too much overhang will allow the rear feet to slip off the back of the washer top.

Remove the plastic clips (2), brackets (2), and pan-head screws (4) from the parts bag. Take a plastic clip (A) and, with the flat side facing out, push it down onto the lower edge of the slot (B) in the dryer back. A flat-blade screwdriver may help to open the plastic clip slightly. Repeat on other side.

Push the hooked end of the bracket (C) down over the plastic clip (A). A flat-blade screwdriver may help to seat the bracket over the plastic clip. Slide the dryer forward as needed and attach bracket (C) to washer with pan-head screws (D). Tighten screws securely. Repeat on other side.

COMPLETE INSTALLATION

Follow the Installation Instructions that came with your washer and dryer to remove the shipping bolts and complete the installation.
