**NFAS NF17 Mantel - CABINET**

## NS1930U/9 SPECIFICATION

Model NS1930U/9 is a single bowl, undermount sink manufactured for Franke Kindred Canada Limited from 18 gauge, 18-10 stainless steel. Product has mirror finished rim and brush finished bowl. Sink is fully undercoated. Basket strainer waste fitting (3 1/2", 89 mm) are included. Sink is backed with a limited buyer lifetime warranty.

- O.D. 18 3/4" x 29 3/4" x 8 1/2" (48 x 76 x 22 cm)
- **Recommended for minimum 36" cabinet**

# *Specifications*

## FAUCET DESCRIPTION

- Reflex™ pulldown system offers smooth operation, easy movement and secure docking
  - Power Clean™ spray technology
  - Metal construction with various finishes identified by suffix
  - Quick connect installation
  - Pulldown spray with 68" braided hose
  - Flexible supply lines with 3/8" compression fittings
  - High arc spout provides height and reach to fill or clean large pots while pulldown wand provides the maneuverability for cleaning or rinsing
  - 360° rotating spout
  - Faucet designed for handle to be mounted on right side only

OPERATION

- Lever style handle
  - Temperature controlled by 100° arc of handle travel
  - Operates with less than 5 lbs. of force
  - Operates in stream or spray mode in the pullout or retracted position

sp.  
FLOW

- Flow is limited to 1.5 gpm (5.7 L/min) max at 60 psi

# CARTRIDGE

- 1255™ Duralast™ cartridge

**STANDARDS**

  - Third party certified to IAPMO Green, ASME A112.18.1/CSA B125.1 and all applicable requirements therein including NSF 61/9G & 372
  - Meets CalGreen and Georgia SB370 requirements
  - Complies with California Proposition 65 and with the Federal Safe Drinking Water Act
  - The backflow protection system in the device consists of two independently operating check valves, a primary and a secondary which prevent backflow

- ADA

- WARRANTY**

  - Lifetime limited warranty against leaks, drips and finish defects to the original homeowner
  - 10 year limited warranty when used in a multifamily installation
  - 5 year limited warranty when used in a commercial installation

Visit [www.moen.com/support](http://www.moen.com/support) for complete details and limitations.

## Specifications

### DESCRIPTION

- Metal construction with various finishes identified by suffix
- 16" long 3/8" tubing connections
- Includes metal or 50/50 pop-up type waste assembly where noted

### OPERATION

- Pivot action lever style handle
- Temperature controlled through 180° degree arc of handle travel

### FLOW

- Flow is limited to 1.5 gpm max (5.7L/min) at 60 psi

### CARTRIDGE

- 1225 cartridge design
- Nonmetallic/nonferrous and stainless steel material
- Can accommodate reversed piping and back to back installations

### STANDARDS

- Third party certified to WaterSense®, CSA B-125.1, ASME A112.18.1 and all applicable requirements referenced therein including NSF61/9
- Complies with California Proposition 65 and with the Federal Safe Drinking Water Act

- ADA for lever handle

### WARRANTY

- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

*There is more than 1 version of this model.  
 Page down to identify the version you have.*

#### DESCRIPTION

- Metal construction with various finishes identified by suffix
- Includes non-metallic showerhead, arm, flange and non-metallic diverter tub spout

#### OPERATION

- Handle operates counterclockwise through a 270° arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3°

#### FLOW

- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi
- NH suffix models contain no showerhead

#### CARTRIDGE

- 1222 cartridge design
- Accommodates back to back installations
- Nonmetallic/nonferrous and stainless steel material

#### STANDARDS

- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are third party certified to WaterSense®

- ADA for lever handle

#### WARRANTY

- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

### Key Features & Benefits

#### Frameless Glass Shelves

Store more items on wall-to-wall shelves for greater storage flexibility.

#### Flexi-Slide™ Bin

Make space for tall items with the bin that quickly and easily moves side to side.

#### Humidity-Controlled Crispers

Store fruits and vegetables in their ideal environment.

# Whirlpool® Top Mount Refrigerator

## PRODUCT MODEL NUMBERS

WRT311FZD      WRT541SZD  
 WRT511SZD

**Electrical:** A 115-volt, 60-Hz, AC-only, 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

**NOTE:** Before performing any type of installation, cleaning, or removing a light bulb, turn the control (Thermostat, Refrigerator or Freezer Control depending on the model) to OFF and then disconnect the refrigerator from the electrical source. When you are finished, reconnect the refrigerator to the electrical source and reset the control (Thermostat, Refrigerator or Freezer Control depending on the model) to the desired setting. See "Using the Controls."

**Water:** A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa) is required to operate ice maker and water dispenser. If you have questions about your water pressure, call a licensed, qualified plumber.

**IMPORTANT:** The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa).

**Reverse Osmosis Water Supply:** If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

## PRODUCT DIMENSIONS

Model Number	Model Size	Reversible Door	Height - Overall "A"	Height - Top of Cabinet "B"	Depth - Door Open 90° "C"	Depth - With Handles "D"	Depth - Without Handles "E"	Depth - Cabinet Only "F"	Width - Cabinet "G"
WRT311FZD	20.5 cu. ft.	Yes	66 1/4" (168.3 cm)	65 1/2" (166.4 cm)	62 1/4" (158.1 cm)	32 7/8" (83.5 cm)	30 5/8" (77.8 cm)	28 1/2" (72.4 cm)	32 3/4" (83.2 cm)
WRT511SZD WRT541SZD	21.3 cu. ft.	Yes	66 1/4" (168.3 cm)	65 1/2" (166.4 cm)	62 1/4" (158.1 cm)	34" (86.4 cm)	32 1/2" (82.3 cm)	28 1/2" (72.4 cm)	32 3/4" (83.2 cm)

## LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for a  $\frac{1}{2}$ " (1.25 cm) space on each and between overhead cabinets and refrigerator top. Allow at least 1" (2.5 cm) between back of cabinet and the wall. If your refrigerator has an ice maker, make sure you leave some extra space at the back for the water line connections.

If you are installing your refrigerator next to a fixed wall, leave 2" (5 cm) minimum on the hinge side (depending on your model) to allow for the door to swing open.

**NOTE:** This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

### Key Features & Benefits

#### 1-Hour Wash Cycle

Clean dishes in half the time so your plates, pans and glasses are thoroughly cleaned up and taken care of in just an hour.\*\*

#### Soil Sensor

Determines how dirty dishes are and adjusts the Normal cycle as needed to make sure dishes come out clean.

#### Normal Cycle

Use for normal amounts of food soil to clean up leftover messes from your day-to-day meals.

\*Per IEC standards. \*\*Compared to Normal cycle with lightly soiled loads. †Based on 12-month average of sales. TraQline 2018. NOTE: Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

WDF130PAH	WDF540PAD	WDT735PAH
WDF131PAH	WDF545PAF	

### DRAIN REQUIREMENTS

- A new drain hose is supplied with your dishwasher. If drain hose is not long enough, use a new drain hose with a maximum length of 12 ft (3.7 m) that meets all current AHAM/IAPMO test standards, is resistant to heat and detergent, and fits the 1" (25 mm) drain connector of the dishwasher. See the "Tools and Parts" section at the front of the guide for part details and orders.
- Make sure to connect drain hose to waste tee or disposer inlet above drain trap in house plumbing and 20" (508 mm) minimum above the floor. It is recommended that the drain hose either be looped up and securely fastened to the underside of the counter or be connected to an air gap.
- Make sure to use an air gap if the drain hose is connected to house plumbing lower than 20" (508 mm) above subfloor or floor.

- If required, the air gap should be installed in accordance with the air gap installation instructions. When you are connecting the air gap, a rubber hose (not provided) will be needed to connect to the waste tee or disposer inlet.
- Use 1/2" minimum I.D. drain line fittings.

### WATER SUPPLY REQUIREMENTS

- This dishwasher has a water heating feature and also requires a connection to a hot water supply line.
- A hot water line with 20 to 120 psi (138 to 862 kPa) water pressure can be verified by a licensed plumber.
- 120°F (49°C) water at dishwasher
- 3/8" O.D. copper tubing with compression fitting or flexible braided water supply line. See the "Tools and Parts" section at the front of the guide for part details and orders.

**NOTE:** 1/2" minimum plastic tubing is not recommended.

- A 90° elbow with 3/4" hose connection with rubber washer. See the "Tools and Parts" section at the front of the guide for part details and orders.
- Do not solder within 6" (152 mm) of the water inlet valve.
- If installed in new construction, make sure the house water supply lines have been flushed prior to connecting the dishwasher to remove any debris that may exist in the supply line.

**NOTE:** If replacing an existing dishwasher, it is recommended to install a new water line (see the "Tools and Parts" section at the front of the guide for part details) and drain hose (supplied) with the new dishwasher.

### ELECTRICAL REQUIREMENTS

#### You Must Have:

- 120-volt, 60 Hz, AC-only, 15- or 20-amp, fused electrical supply
- Copper wire only
- A maximum of 2 field wiring supply conductors (12 AWG largest size) plus 1 grounding conductor are permitted in the terminal box.

#### We Recommend:

- A time-delay fuse or circuit breaker
- A separate circuit

#### If Connecting Dishwasher with a Power Cord:

- Use a UL Listed power cord kit marked for use with dishwasher. See the "Tools and Parts" section at the front of the guide for part details and orders.
- Plug into a grounded 3 prong outlet. Outlet must meet all local codes and ordinances.

#### If Connecting Dishwasher with Direct Wiring:

- Use flexible, armored, or nonmetallic sheathed copper wire with grounding wire that meets the wiring requirements for your home and local codes and ordinances.
- Use a UL Listed/CSA Approved metallic strain relief.

**PRODUCT AND CABINET OPENING DIMENSIONS**

For 4" (100 mm) toe kick, height of cabinet opening is 34 1/2" (863 mm).

- A. Insulation may be compressed (not used on all models).
- B. Door handles may protrude forward of the face of the dishwasher, (varies by model).

Check that all surfaces have no protrusions that would prohibit dishwasher installation.

- C. Measured from the lowest point on the underside of the countertop. May be reduced to 33 1/2" (851 mm) by removing the wheels and perforated area of insulation (blanket) on dishwasher.
- D. Minimum, measured from narrowest point of opening.

**Recessed area or closet installation (stacked washer and dryer)**

**Custom cabinet installation**

**Custom under counter installation**

## Drain System

It is the responsibility of the installer to install and secure the drain hose in to the provided plumbing/drain in a manner that will avoid the drain hose coming out of leaking from the plumbing/drain.

Drain system can be installed using a floor drain, wall standpipe, floor standpipe, or laundry tub. Select the method you need.

**IMPORTANT:** To avoid siphoning, only 4.5" (114 mm) of drain hose should be inside standpipe. Always secure drain hose with cable tie.

### Floor standpipe drain system

Minimum diameter for a standpipe drain: 2" (51 mm). Minimum carry-away capacity: 17 gallons (64 L) per minute. A 1/4" (6 mm) diameter to 1" (25 mm) diameter Standpipe Adapter Kit is available; refer to the Quick Start Guide for online ordering information. Top of standpipe must be at least 39" (762 mm) high; install no higher than 96" (2.4 m) from bottom of washer. If you have an overhead sewer and need to pump higher than 96" (2.4 m), a sump pump and associated hardware are needed. See "Alternate Parts."

**Recessed area or closet installation (washer only)**

### Wall standpipe drain system

See requirements in "Floor standpipe drain system."

### Laundry tub drain system

Minimum capacity: 20 gallons (76 L). Top of laundry tub must be at least 39" (991 mm) from the floor; install no higher than 96" (2.4 m) from bottom of washer.

### Floor drain system

Floor drain system requires a Siphon Break Kit, 2 Connector Kits, and an Extension Drain Hose that may be purchased separately; refer to the Quick Start Guide for online ordering information. Minimum siphon break height: 28" (710 mm) from bottom of washer. (Additional hoses may be needed.)

### Electrical Requirements

#### WARNING

#### Electrical Shock Hazard

**Plug into a grounded 3 prong outlet.**

**Do not remove ground prong.**

**Do not use an adapter.**

**Do not use an extension cord.**

**Failure to follow these instructions can result in death, fire, or electrical shock.**

- A 120 V, 60 Hz, AC only, 15 or 20 A, fused electrical supply is required. A time-delay fuse or circuit breaker is recommended. It is recommended that a separate circuit breaker serving only this appliance be provided.
- This washer is equipped with a power supply cord having a 3-prong grounding plug.
- To minimize possible shock hazard, the cord must be plugged into a mating, 3-prong, grounding-type outlet, grounded in accordance with local codes and ordinances. If a mating outlet is not available, it is the personal responsibility and obligation of the customer to have the properly grounded outlet installed by a qualified electrician.
- If codes permit and a separate ground wire is used, it is recommended that a qualified electrician determine that the ground path is adequate.
- Do not ground to a gas pipe.
- Check with a qualified electrician if you are not sure the washer is properly grounded.
- Do not have a fuse in the neutral or ground circuit.

### GROUNDING INSTRUCTIONS

#### For a grounded, cord-connected appliance:

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

**WARNING:** Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the appliance is properly grounded. Do not modify the plug provided with the appliance: If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

#### For a permanently connected appliance:

This appliance must be connected to a grounded metal, permanent wiring system, or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment-grounding terminal or lead on the appliance.
