Linear Output Power for Even Cooking

Unlike other microwave ovens, Inverter® technology provides an always-on, constant energy flow – then variably adjusts the intensity for each meal selection. Other ovens try to create lower energy levels by using the same maximum power all the time, but repeatedly turning it on and off. Panasonic's consistent and precise heat means you can cook, reheat or defrost foods without overcooking edges. You'll enjoy delicious, healthy cooking results, and all in less time!

The diagram illustrates the difference in cooking efficiency between Panasonic Inverter and Traditional microwaves. It shows two timelines: 1 sec and 15 sec. For the 1 sec timeline, the Panasonic Inverter Microwave shows a full grid of power dots, while the Traditional Microwave shows a sparse grid. For the 15 sec timeline, the Panasonic Inverter Microwave shows a full grid of power dots, while the Traditional Microwave shows a sparse grid. This indicates that the Inverter Microwave maintains consistent power throughout the cooking time, while the Traditional Microwave cycles on and off, leading to uneven cooking.

MWTK-60

24" / 60cm Stainless Steel Trim Kit

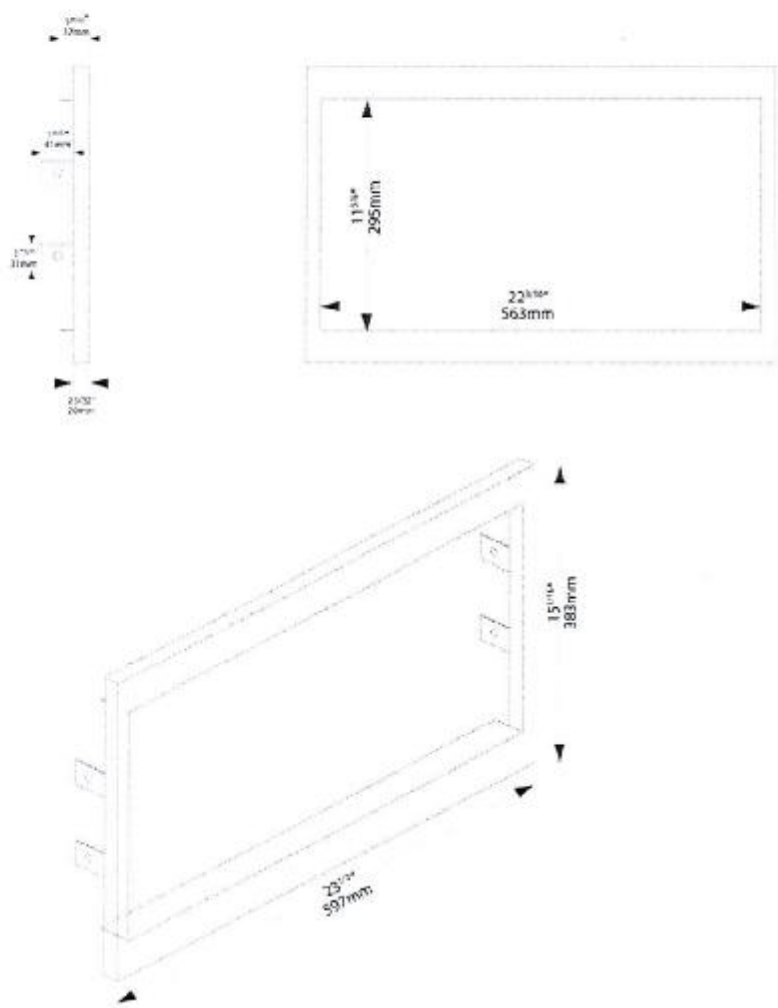

1. Unscrew the 4 screws holding the 2 pieces of wood in place, and retain the screws
2. Hold the MWTK-60 in place and position the 2 pieces of wood against the cabinet sides and against the MWTK. Remove the MWTK
3. Screw the 2 pieces of wood onto the base of the cabinet. The wooden strips should touch the inside of the front of the MWTK-60, and be aligned against the side gables.
(wooden stripes 18" = 46cm apart)
4. Being careful not to scratch the microwave door, lift the microwave onto the wooden strips, and move it back about 2 inches.
5. Place the MWTK-60 into position. Use the 4 screws and screw them through the flanges into the side gables.
6. Pull the microwave forward, and align the front of the microwave with the front of the MWTK-60
7. To stop the microwave from sliding backwards whilst opening it, it might be necessary to attach a piece of wood behind the feet of the microwave, on the wooden supports
8. Air must be able to flow from the microwave upwards and into the room, or roof space. Failure to comply will void the manufacturer's warranty on the micro wave oven.
