42" BUILT-IN FRENCH DOOR REFRIGERATOR/FREEZER WITH INTERNAL DISPENSER

SUB-ZERO

BI-42UFDID/S

More
Senator
Lot 18

FEATURES

- Discreet interior water dispense with advanced filtration
- LED Lighting for brighter interior
- Maximum capacity in a 42" French door model
- Dual refrigeration keeps food fresher longer
- Air purification system fights spoilage, odors
- Crispers and deli drawers in low-temp, high-humidity zones for optimum freshness
- Microprocessor control assures peak performance
- Two-column shelving for customized storage
- Soft-close deli drawer for meats, cheeses and more
- Freshness cards for maximum food preservation
- Adjustable shelves for maximum convenience
- Rigorously tested in our U.S. manufacturing facilities to ensure decades of use
- Exceptional 24/7 support from Madison, WI-based Customer Care team
- Over-and-under refrigerator/freezer storage
- Magnetic door seal system locks in cold air
- Automatic ice maker with "max ice" feature

ACCESSORIES

- Air Purification Cartridge
- Built-In Custom Side Panel Mounting Kit
- Egg Container
- Stainless Steel Side Panel
- Water Filter 4204490
- White Side Panel
- Stainless steel kickplate
- Grilles for 83" or 88" finished height (84" is standard)
- Side panel mounting kit

Accessories are available through an authorized Sub-Zero dealer.
For local dealer information, visit subzero-wolf.com/locator.

WARMING DRAWERS

Warming Drawers

Wolf warming drawers are designed to take care of prepared foods until it's time to serve them. You can adjust the temperature, keeping moist foods moist and crisp foods crisp. Warming drawers are ideal for proofing dough. They can also be used to warm robes and towels. Drawer fronts are available to match the look of Wolf ovens, sealed burner rangetops and outdoor grills. The integrated drawer front allows for a custom panel and handle. Model WWD300, approved for outdoor installations, is ideal for any outdoor kitchen.

Warming Drawers

DRAWER FRONT OPTIONS

Wolf warming drawer fronts allow for many design options, but the warming drawer itself will be the same for all applications. A panel mounting kit is required when installing a custom panel. The panel mounting kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

The 2" (51) thick drawer front, in 30" and 36" widths, is designed to be installed below a sealed burner rangetop or outdoor gas grill, so the panel aligns properly with the front of the rangetop or grill. Dimensions for the warming drawer remain the same, even though the drawer front may be wider to match a Wolf 36" oven, sealed burner rangetop or outdoor grill.

WARMING DRAWERS

Planning Information

The warming drawer must be installed with a Wolf drawer front, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Specific installation instructions are included with the drawer front.

The warming drawer can be installed in a standard or flush inset application (excludes L series drawer front).

For a standard installation, the drawer collar and front panel sit proud of the cabinet face frame. A recessed installation requires the cabinetry be recessed by 3/16" (5) so the collar is flush with the cabinet face frame but the drawer front will sit proud. A flush inset installation (excludes L series) requires the drawer collar and front panel be recessed to be flush with surrounding cabinetry. Refer to illustrations on the following pages for minimum cabinet dimensions for your specific installation.

Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

Model WWD300 is CSA approved for outdoor installations.

INSTALLATION REQUIREMENTS

Min Base Support	200 lb (90 kg)
Trim Overlap (top, bottom, sides)	5/8" (16)

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the warming drawer can be placed in an adjacent cabinet within reach of the power cord.

IMPORTANT NOTE: When installed outdoors, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	3' (.9 m)
