Ice Max

The Ice Max produces up to 10lbs (4.5kg) of ice a
day and store up to 4.2lbs (1.9kg) of ice at a time.
And its slim and compact design means it takes
up less space, so there is more room to store food.

* Based on internal testing compared with conventional Samsung model.
Samsung RF28R7751- ice storage up to 4.2lbs (1.9kg) / ice making capacity
per day up to 10lbs (4.5kg).

EZ-Open™
Handles

Open the mid and freezer drawers with a gentle
pull using the EZ-Open™ Handles. Simply lift up
the handle and it breaks the door's vacuum seal.
The drawer will glide open without having to pull
hard, ideal for children or the elderly. But the
latch keeps the door securely shut.

Step-by-step installation

STEP 1 Select a site

Select a site that:

- Has a solid, level surface without carpeting or flooring that may obstruct ventilation
- Is away from direct sunlight
- Has adequate room for opening and closing the door
- Is away from any heat sources
- Provides room for maintenance and servicing
- Has a temperature range between 50 °F (10 °C) and 109 °F (43 °C)

⚠ CAUTION

- If your refrigerator is equipped with an ice maker, provide extra space at the rear of the refrigerator for the water line connection.
- When you install the refrigerator next to a fixed wall, you must provide a minimum clearance of 3 ³/₄" (95 mm) from the wall to allow the door to swing open.
- Use of an electrical outlet with a ground fault interrupter (GFI) is not recommended.

🗐 NOTE

To facilitate moving your refrigerator to its final location, be sure to measure the width and height of doorways, thresholds, ceilings, stairways, and anything else that needs to be taken into consideration to ensure you can move your refrigerator safely. The following diagram illustrates the exact height and depth (factory specifications) of your refrigerator.

Easy and intuitive control

With Virtual Flame Technology ™ you can enjoy the intuitive visual control of flames. LED lighting in front of the burners glows like a real gas flame to clearly show if they're on or off, giving added peace of mind.

Automatically safer to prevent accidents

A Safety Shutoff provides complete peace of mind. It automatically turns off any cooking zones if things have been left cooking on them for a long time or there's no change in the operation after a certain period.

Safe and efficient residual heat use

A 2 Stage Residual Heat Indicator lets you safely and efficiently use any residual heat for cooking. It clearly shows an 'h' if a cooking zone is hot or an 'H' if it is very hot, but turns off when safe to touch.
