### DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)

Most 30" Wall Cabinets can be used with this unit

**Note:** These ovens are not approved for stackable installations. Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194°F temperature rating.

Door handle protrudes 2-1/2" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

**Electric wall ovens are not approved for installation with a plug and receptacle. They must be hard wired in accordance with installation instructions.**

#### Installation Information:

Before installing, consult installation instructions packed with product for current dimensional data and for alternate installation options.

**Note:** A minimum gap of 14" from either side of the wall oven to an adjacent 45 or 90 cabinet, drawer or was is required to avoid interference with the opening of the doors. The handles protrude 2-1/2" from the door face.

Countertops may need to be notched on either side of the wall oven to avoid interference with the opening of the doors.

**THIS MODEL IS NOT APPROVED FOR FLUSH-MOUNT INSTALLATION**

## DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)

**Note:** 30" Double electric wall ovens are approved for installation above 27" and 30" warming drawers.

**Attention installer:** Electric wall ovens are NOT approved for installation with a plug and receptacle. They must be hard wired into an approved junction box.

**Important:** Before installing, consult installation instructions packed with ALL products for current dimensional and combination data.

**When to use the pedestal rails:** When replacing an older GE Appliances 30" double wall oven with a new GE Appliances model. Cutout Height = 51-13/16" to 51-15/16". This is our traditional cutout height.

**When not to use the pedestal rails:** When replacing a 30" double wall oven from another manufacturer (ie Whirlpool) with a new GE Appliances model. Cutout height = 50-1/4". You will need to verify that the existing cutout matches the 50-1/4" dimension.

If the new GE Appliances 30" double wall oven is being installed into new construction (ie not a replacement), then the recommended installation is to use the pedestal rails.
