

BX212 | CLASSIC Collection

~~28~~ 34"
(34" includes 3 filters)

22"

Insert

The three speed control is located on the underside of the BX212 for easy access and control. The range hood cannot be seen from eye-level, allowing you to arrange your cabinets as though there were no fan, creating a fluid and classy look. Mesh filters efficiently filter the air while bright halogen light bulbs provide all the illumination you'll need. Another innovative design unique to Cyclone.

PROFESSIONAL SERIES

36" DROP-IN GAS COOKTOP 6 BRASS BURNERS

Bring Italian design and precision into your kitchen with the Bertazzoni signature low edge drop-in cooktop, designed to install almost flush with the countertop.

Cook like a pro on the 6 brass burners and cast iron contour grates, spaciously laid out to accommodate pots of different sizes.

Crank up the heat to boil water, sear meat or cook with a wok using the two power burners with dual ring flame, which boil water faster than any burner in their class (19,000 BTUs with LP gas).

Delicately melt chocolate on the simmer burner.

Protect your house and your family with the 100% fail-safe thermocouple technology that immediately shuts off the flow of gas in case of a flame outage.

Clean in no time after cooking, thanks to the seamless one-piece stainless worktop with no gaps, joints or fasteners.

Designed and manufactured with pride by Bertazzoni in Italy.

Industry leading 2 years parts and labor warranty.

PRODUCT FEATURES	
Maintop	6 burners
Burner power	1 power burner 17000 BTU 1 rapid burner 10400 BTU 3 medium burners 6000 BTU 1 simmer burner 3750 BTU
Ignition system	Electric with thermocouple safety device
Grates	Cast iron
Included accessories	Wok ring Simmer ring
TECHNICAL SPECIFICATIONS	
Electrical supply	120 V 60 HZ - 1 W 1 Amps
Power connection	NEMA 5-15P with 59" power cord
Certification	CGA,CSA
Warranty	2 years parts & labor
Gas type	NG
Conversion kit included	LPG
Packaging dimensions and weight	W 41 5/8" H 8 1/4" D 26" 70.0 lbs

ELECTRICAL & GAS CONNECTION

E

A properly-grounded, horizontally-mounted electrical receptacle should be installed according to this drawing.

G

An agency-approved, properly-sized manual shut-off valve should be installed according to this drawing.

INSTALLATION REQUIREMENTS

Combustible material cannot be installed within shaded area.

For installation with an updraft or downdraft hood as well as any OTR, refer to the hood/OTR manufacturer's installation requirements.

ELECTRICAL CONNECTION

If codes permit and a separate ground wire is used, it is recommended that a qualified electrical installer determine that the ground path and the wire gauge are in accordance with local codes. Check with a qualified electrical installer if you are not sure the oven is properly grounded.

This oven must be connected to a grounded metal, permanent wiring system.

Be sure that the electrical connection and wire size are adequate and in conformance with the National Electrical Code, ANSI/NFPA 70-latest edition or CSA Standards C22.1-94, Canadian Electrical Code, Part 1 and C22.2 No. O-M91-latest edition, and all local codes and ordinances.

To properly install your oven, you must determine the type of electrical connection you will be using and follow the instructions provided for it here.

- Oven must be connected to the proper electrical voltage and frequency as specified on the model/serial/rating plate. See the following illustration.

A. Model/serial/rating plate

- Models rated from 7.3 to 9.6 kW at 240 volts (5.4 to 7.4 kW at 208 volts) require a separate 40-amp circuit. Models rated at 4.8 kW and below at 240 volts (3.6 kW and below at 208 volts) require a separate 30-amp circuit.
- A circuit breaker is recommended.
- Connect directly to the fused disconnect (or circuit breaker box) through flexible, armored or nonmetallic sheathed, copper cable (with grounding wire). See "Make Electrical Connection" section.
- Flexible conduit from the oven should be connected directly to the junction box.
- Do not cut the conduit. The length of conduit provided is for serviceability of the oven.
- A UL listed or CSA approved conduit connector must be provided.
- If the house has aluminum wiring, follow the procedure below:
 - Connect a section of solid copper wire to the pigtail leads.
 - Connect the aluminum wiring to the added section of copper wire using special connectors and/or tools designed and UL listed for joining copper to aluminum.

Follow the electrical connector manufacturer's recommended procedure. Aluminum/copper connection must conform with local codes and industry accepted wiring practices.

For power requirements, refer to the following table.

Model	Voltage	Amperage (L1)*	Amperage (L2)*	Rating (W)
KOCE507E/KOCE500E	120/240	32	30	8000
KOCE507E/KOCE500E	120/208	30	28	6600

*Amperage values noted above are for information purposes only: the units are rated in watts.

PRODUCT DIMENSIONS

Cabinet Dimensions

* **NOTE:** The cabinet height can be between 41" (104.1 cm) and 41½" (105.6 cm) for microwave/oven combination.
