Mega Capacity

Do laundry a little less often. With 7.3 cubic feet of capacity, this dryer handles really large loads. Saving you time and energy.

EasyLoad™ Door

The dual-opening options of the LG EasyLoad™ door make loading and unloading the dryer easier than ever. Transferring wet clothes from the washer? Simply press the release button and pull the door down, hamper style to keep that stray sock from hitting the floor. Removing dry items? Swing the door to the side to clear the way for your basket below. Even tight spaces and challenging laundry-room layouts are no match for versatility like this.

Steam Sanitary™ Cycle

Wash the unwashable. You probably wish you could clean your throw pillows or children’s toys. With the SteamSanitary™ Cycle, you can. It uses steam to safely sanitize items marked as non-washable.

Accurate Drying

LG’s Sensor Dry System measures the moisture levels during the cycle and automatically adjusts the drying time, assuring you get dry laundry every time.

Call, Connect, Resolve

SmartDiagnosis™ uses self-diagnosing technology that can communicate 24/7 with LG customer service over the telephone providing you with comfort and reliability.

## ELECTRICAL OUTLET LOCATION

Outlet should NOT be in the shaded area as indicated on Illustration 3

**NOTE 1:**

The floor of the opening should be constructed of plywood strong enough to support the weight of the oven and floor load (approximately 100 pounds). The floor should be level for proper operation of the oven. Be sure to check the local building code as it may require that the opening be enclosed with side, ceiling and rear partition. The proper functioning of the oven does not require the enclosure.

**IMPORTANT:** Secure screws in outer hole. 3 pcs are needed for exhaust duct assembly

**IMPORTANT:**  
Before installing the exhaust duct, confirm the floor is level. The level bubble should be equal distance from level guide lines.

Wall Mount

We’ve learned that sometimes the best way to anticipate the needs and desires of your market is to listen to the men and women who install your product. Inspired by our most popular model, the SC300, we have designed an install-friendly hood that makes all the “what if’s” of installation a non-issue. Keeping the pyramid shape, we expanded the chimney flue (duct cover) just wide enough to conceal off-centre ducting. Bringing our lights to the front of the hood provides greater ambience in the most used cooking area and also avoids drawing attention towards any imperfections from the backsplash. We also slanted our baffle filters to maximize air and grease collection. The SCB316 has every kind of installer in mind.
