NOTES:

- Allow at least 21" (53.3cm) clearance in front of oven for door depth when it is open.
- Dimension G (cutout depth) is critical to the proper installation of the built-in oven. If the oven decorative trim does not butt against the cabinet verify dimension G to assure it is the required depth.
- 3. For a cutout height greater than H maximum, add 2" (5 cm) wide wood shims of appropriate height to each side of the opening under the appliance side rails. You can order a larger bottom trim through a service center.
- 4. If the junction box is below the oven, longer conduit cables are available through a service center.

23 cu. ft. 4-Door French Door Refrigerator

SAMSUNG

MODEL RF23BB8600 DIMENSIONS

Be sure your new fridge will fit

Don't wait until delivery to be sure your new refrigerator will fit – both in your kitchen and through all doorways. This guide includes all pertinent measurements and clearances so you can buy with confidence.

TOP OF REFRIGERATOR WITH DRAWER OPEN

TOP OF REFRIGERATOR WITH DOORS OPEN 125°

Counter-Depth Refrigerator

Counter-depth models sit flush with your kitchen cabinets for a premium, built-in look. They are perfect for galley and island kitchens where space is limited.

Installation clearances

- ✓ Allow 3 ³/₄" of clearance when installing along a wall. This will allow for the door to open 90 degrees without the handle contacting the wall.
- ✓ Allow 2" minimum clearance at rear for proper air circulation and water/electrical connections.
- ✓ Allow a ³/₈" minimum clearance at sides and top for ease of installation.

For optimal usage and ability to open refrigerator doors completely, do not install next to a wall.

Please note: The above dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product or download manual online at samsung.com.

Walk the delivery route

✓ Identify the narrowest opening that the appliance will travel through, from outside the home to the location where it will be installed.

✓ Appliance depth or width must be smaller than the width of the narrowest opening.
