## Installing Your Gas Professional Range

* Side clearance above cooking surface to any objects, i.e., wall.

30" minimum clearance between the top of the cooking surface and the bottom of an unprotected wood or metal cabinet; or 24" minimum when the bottom of the wood or metal cabinet is protected by not less than 1/4" flame-retardant millboard covered with not less than no. 28 MSG sheet steel, 0.015" stainless steel, 0.024" aluminum or 0.020" copper.

IMPORTANT: If overhead cabinets are installed, a range hood should also be installed and project horizontally a minimum of 5" beyond the front of the cabinets. Hood is necessary to dissipate any heat buildup in the overhead cabinets to prevent possibility of fire, personal injury and/or death.

SAMSUNG

26 cu. ft. Large Capacity 3-Door French Door Refrigerator with External Water & Ice Dispenser

Installation Specifications

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).

2. Refer to illustration below to determine dimensions.

3. Allow 2.5" of clearance on hinge side of refrigerator when installing next to a wall where handle may make contact.

4. Allow 1" minimum clearance at rear for proper air circulation and water/electrical connections. Allow a 3/8" minimum clearance at sides and top for ease of installation.

5. Ensure each door and entryway in the home is wide enough for the refrigerator to be moved through easily.

For optimal usage and to be able to open refrigerator doors completely, do not install next to a wall.

Please note: The following dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product, or download manual online at samsung.com.
