A detailed black and white line drawing of a two-story stone building. The building features a steep gabled roof with a small finial at the peak. The front facade is constructed from stone blocks. On the left, there are two large, arched double doors with decorative panels. Above them is a large, arched window with a grid pattern. To the right, a tall brick chimney rises from the roofline. Further right, there is another gabled section with a smaller arched window and a larger arched window below it. The drawing uses hatching and cross-hatching to create texture and shadow on the stone surfaces.

This architectural elevation drawing depicts a three-story brick building with a symmetrical facade. The roof is a steep gable with a decorative bargeboard along the eaves. The central feature is a large bay window on the second floor, topped with a pediment and featuring multiple panes. The first floor has a recessed entrance area with a small balcony or porch. The facade is punctuated by several rectangular windows, some with decorative lintels and sills. The brickwork is rendered with a detailed pattern of lines.

This architectural drawing depicts a three-story brick building with a gabled roof. The facade is composed of brickwork. The second floor features three rectangular windows with decorative lintels and sills. The first floor has a central entrance with a glass door and a small balcony with a metal railing. To the right of the entrance is a large bay window with multiple panes and a decorative pediment. A small dormer window is located in the gable. The drawing is a black and white line art illustration.

This architectural drawing shows a three-story brick building with a mansard roof. A small dormer window is located in the roof's center. The facade features several windows: a large bay window on the ground floor with a decorative pediment, and a small balcony with a black metal railing on the second floor. The building is rendered in a detailed, hatched style.
