Hi Simone:

Yes we are moving forward with the wine fridge; I was sure my husband spoke to QTK about this space for that.

So yes please confirm this with them.

Thank you, Angela Mazza Lot 69

Hi Angela,

I recently received the paperwork with all your colour selections that were made with Stacey at the Décor centre. I see that you have purchased a plug for a wine fridge, however I don't see the wine fridge in the kitchen layout. Can you please confirm if you are moving forward with the wine fridge, if so I will need to contact QTK to ensure that a space is left for this.

Please let me know a.s.a.p.

Best Regards,

Thank you,

ZANCOR

ACKNOWLEDGEMENT OF RECEIPT FOR GRANITE AND MARBLE INFORMATION

Purchaser acknowledges receipt, understanding and acceptance of the following information as provided by the Vendor for Granite and Marble finishes.

- GRANITE IS A 100% NATURAL PRODUCT Every stone has its own unique qualities and characteristics. These range from natural pitting to areas of crystal deposits embedded within the stone as well as the stone's unique motion and patterns. Being a natural product that is quarried right from the earth, it also possesses excellent wear, resistance and heat exposure qualities.
- STONE HAS THE ABILITY TO REFLECT LIGHT DIFFERENTLY The same stone may appear to be different when viewed in various lighting conditions and different angles. The stone may also vary in colour or wave motion from one side to another depending on the concentration of minerals and crystals embedded within that stone. Thus, it is not always possible to book match the pieces of stone across joint or corner areas.
- EDGE FINISHES ARE NOT ALWAYS EQUIVALENT TO THE TOP FINISH The difference is often due to the stone's physical properties, colour and with the finished edge bias being different than that of the top surface. The finish is also affected by the type of edge profile, which is chosen.
- STONE IS A NATURAL PRODUCT THAT HAS MANY TINY PORES Liquids such as oils and red wine if left on the surface, may leave a ring. When using oil and red wines, it is best to wipe up the spills as soon as possible and leave the top to air dry.
- VIEW AND PICK YOUR SLAB FROM OUR SUPPLIER'S INVENTORY The Vendor will arrange for the Purchaser to view and select the slab of stone that the countertop will be made from, prior to it being templated. This will provide the Purchaser the opportunity to confirm that the counter will meet the Purchaser's expectations, as much as possible.
- PLEASE LOOK AT YOUR STONE CAREFULLY The Purchaser needs to be aware that the surface finish will have fissures, pits and pores. These naturally occurring features will vary in frequency and intensity depending on the type of stone chosen by the Purchaser.
- GRANITE IS AN IGNEOUS ROCK Meaning the stone was formed by the cooling and solidification of magma deep within the earth. Granite is composed of grains or crystals of Quartz, Feldspar and Mica.
- GRANITE IS A VERY HARD ROCK It is highly resistant to being scratched. On a scale of 1 to 10, Talc and Gypsum is at 1 and 2; Corundum and Diamond is at 9 and 10; and GRANITE is at 5 to 7. It withstands extreme temperatures, and is not nearly as prone to staining as marble is.
- GRANITE COUNTER TOPS WILL HAVE JOINTS Purchaser aware one joint will be at each corner and on either side of slide-in-range (if applicable). It will also be where the length of the counter top exceeds the length of a stone slab. Slabs are usually approximately 5'x8'. A 3'4'' countertop weighs approximately 15 lbs., and a 1~3'4''counter top weighs as much as 23 lbs. per square foot.

MARBLE

- MARBLE IS A METAMORPHIC ROCK This means it was formed with limestone. Calcite/Dolomite was put under pressure and high temperatures deep within the earth's crust. The heat and pressure aftered its crystalline structure and introduced other minerals that produced the colours and veining that marble is commonly known
- MARBLE IS VERY SOFT It can be scratched easily. On a scale of 1 to 10, Talc and Gypsum at 1 and 2; and Corundum and Diamond at 9 and 10; Marble is a 3 on that scale.
- MARBLE IS VERY SUSCEPTIBLE TO STAINING AND ETCHING Marble is NOT recommended for use as a counter top in kitchens. Marble is often used in bathroom counter top – however is very porous and may show
- MARBLE SHOULD NEVER BE CLEANED WITH SCOURING PADS Abrasive cleaners should NOT be used either, as they WILL scratch and damage the marble. Use the proper dedicated cleaners for marble counter tops.
- CLEANING PRODUCTS Solutions containing lemon oil or vinegar should NOT be used.
- COASTERS SHOULD BE USED Use under all glasses, particularly those containing alcohol or citrus juice.
