Features

- The Original Dimplex Flame Effect™**  
A blend of technology, artistry and craftsmanship that sets the standard for realism.
- Acrylic Ice Media Bed**  
Light plays through different size pieces and sparkle in a spectrum of colors.
- Media Accent Colors**  
Choose from a variety of brilliant color themes or cycle through a range of colors using the custom mode, freezing on the hue of your choice.
- Flexible Installation**  
Simply surface mount and plug-in or fully-recess and direct wire for a seamless installation
- Hanging Glass Design**  
Detachable glass trim easily finishes rough openings and provides access to media.
- Remote Thermostat Control**  
Temperature control at your fingertips for convenient comfort.
- Multi-function Remote**  
Control the flame, heat and thermostat from the comfort of your chair.
- LED Lighting**  
Flame and lights use brilliant, low-energy LED's that require zero maintenance.
- All-season Flames**  
Enjoy the unique charm of a fireplace 365 days a year using the flames without the heat.
- Cool-touch Glass**  
Glass remains cool making it safe for any location and any user.
- Low Carbon Footprint**  
The most sustainable fireplace option, no emissions and 100% efficient.

Requirements	120 / 240 VAC, 120 / 208 VAC

## INSTALLATION REQUIREMENTS

- The cabinet base platform must be able to support 202 lbs. (91.65 kg) for a Microwave Combination Wall Oven. If the cabinet does not have a solid bottom, two braces or runners must be installed level with the bottom of the cutout to support the weight of the oven. Make sure the base is level and the front of the cabinet is square. If the cabinet base is not level, the oven racks will tend to slide out when opening the door.
- If marks, blemishes, or the cutout opening are visible above the installed oven, it may be necessary to add wood shims under the runners and front trim until the marks or opening are covered.
- If the cabinet does not have a front frame and the sides are less than 3/4" (1.9 cm) thick, shim both sides equally to establish the cutout width.
- The junction box must be flush with the rear wall of the cabinet as shown below.
- Allow at least a 2" clearance for the door depth when it is open.
- Kitchen cabinets in contact with the oven must be heat resistant up to 194°F (90°C), and fronts of nearby units up to at least 158°F (70°C).

## CUTOUT DIMENSIONS

- Cabinet Width: 30" (762 mm)
- Recommended Minimum  
Circuit Location  
from Floor: 12" (304.8 mm)
- Cutout Depth: 23 1/2" Min. (596.9 mm)
- Cutout Width: 28 1/2" Min. (723 mm)  
28 5/8" Max. (727 mm)
- Cutout Height: 43 7/16" Min. (1103 mm)  
43 1/2" Max. (1106 mm)

## PRODUCT DIMENSIONS

## ELECTRICAL CONNECTIONS

- **Be sure the wall oven is installed and grounded properly by a qualified installer or service technician.**
  - This wall oven must be electrically grounded in accordance with local codes or, in their absence, with the National Electrical Code (ANSI/NFPA No. 70 - latest edition in United States; or with CSA Standard C22.1 - 1992 and C22.2 No.01982 (or latest edition), Canadian Electrical Code, Part I, and all local codes and ordinances.
  - This wall oven must be supplied with the proper voltage and frequency, and connected to an individual, properly grounded branch circuit, protected by a circuit breaker or fuse. For the circuit breaker or fuse required by this model, see the rating plate to find the wattage consumption and refer to the table below to get the circuit breaker or fuse amperage.
  - A Microwave Combination Wall Oven can consume up to 7,800 W at 240 VAC. A 50 Amp circuit breaker with wire gauge #8 AWG must be used.
  - Do Not ground to a gas pipe.
  - A UL-listed conduit connector must be provided at the junction box.
  - **Prepare the electrical connection as follows:**
    - Turn off the circuit breaker or remove fuses to the oven branch circuit.
    - With the oven positioned directly in front of the cabinet opening, connect the flexible conduit to the electrical junction box as shown below. Position the conduit in such a manner that it will lie on top of the oven in a natural loop when the oven is installed.
    - If local codes permit connection of the frame grounding conductor to the neutral(white) wire, follow the instructions for a 3-wire circuit connection.
    - If used in mobile homes or new construction, or a recreational vehicle, or local codes do not permit connection of the frame grounding conductor to the neutral(white) wire, follow the instructions for a 4-wire circuit connection.
- 
- 5' Min
- 4' Min
- Junction Box Location
- For Microwave Combination Wall Ovens, the junction box must be requested and conduit connector must be used at junction box.

## INSTALL THE OVEN

- Install the oven into the cabinet as follows:**

- Slide the oven into the opening.
  - a. Loop (do not tie) a 36" (91 cm) string around the conduit before the oven is slid into place. Lay the string over the top of the oven and use it to keep the conduit from falling behind the oven.
  - b. Lift oven into cabinet cutout using the oven opening as a grip. Carefully push against the oven front frame. Do not push against outside edges.
  - c. While sliding the oven back, pull the string so that the conduit lies on the top of the oven in a natural loop.
  - d. When you are sure the conduit is out of the way, slide the oven 3/4 way back into the opening. Remove the string by pulling on one end of the loop.
- Secure the oven.

- purchased at any hardware store.
- Install the metal bottom trim.
  - a. Place the metal bottom trim centered over the pre-drilled mounting holes on the lower base.
  - b. Using 3 screws provided, secure the bottom trim to the bottom edge of the cabinet.
- Reinstall the oven door.

# INSTALLATION REQUIREMENTS

## Tools and Parts

Gather the required tools and parts before starting installation. Read and follow the instructions provided with any tools listed here.

### Tools needed

- Tape measure
- Marker or pencil
- 1/4" (6.35 mm) nut driver
- Pliers
- Flat-blade screwdriver

### Parts supplied

- Foam strip roll
- 2 1/2" (6.4 cm) clamping
- Clamping brackets (2)
- screws (2)

### Parts needed

- A UL listed or CSA approved connector for 1/2" (1.3 cm) diameter conduit
  - UL listed wire connectors
- Check local codes. Check existing electrical supply. See the "Electrical Requirements" section.
- It is recommended that all electrical connections be made by a licensed, qualified electrical installer.

## Location Requirements

**IMPORTANT:** Observe all governing codes and ordinances. When installing cooktop, use minimum dimensions given.

- To eliminate the risk of burns or fire by reaching over the heated surface units, cabinet storage space located above the surface units should be avoided. If cabinet storage is to be provided, the risk can be reduced by installing a range hood that projects horizontally a minimum of 5" (12.7 cm) beyond the bottom of the cabinets.
- The cooktop must be a specified cooktop that is approved to be installed either alone or over an undercounter built-in oven. Check the cooktop base for an approved installation label. If you do not find this label, contact your dealer to confirm that your cooktop is approved.
- The cooktop must be installed in a level countertop.
- Ovens approved for this type of installation will have an approval label located on the top of the oven. If you do not find this label, contact your dealer to confirm that your oven is approved. Refer to oven manufacturer's installation instructions for approval for built-in undercounter use and proper cutout dimensions.

- The cooktop should be installed away from strong draft areas, such as windows, doors, fans or strong heating vents. The cooktop should be located for convenient use in the kitchen.
- Use the countertop opening dimensions that are given with these installation instructions. Given dimensions are minimum clearances and provide 0" (0 cm) clearance.
- Grounded electrical supply is required. See "Electrical Requirements" section.

**IMPORTANT:** To avoid damage to your cabinets, check with your builder or cabinet supplier to make sure that the materials used will not discolor, delaminate, or sustain other damage.

## Product Dimensions

- A. Glass depth - black and white models - 21 3/4" (55.2 cm)  
Glass depth - stainless steel models - 22 1/8" (56.4 cm)
- B. Glass width - 24" (60.9 cm) models - 23 13/16" (60.5 cm)  
Glass width - 30" (76.2 cm) models - 30 13/16" (78.4 cm)  
Glass width - 36" (91.4 cm) models - 36 7/16" (92.3 cm)
- C. Frame depth - 20 1/4" (51.5 cm)
- D. Frame width - 24" (60.9 cm) models - 21 9/16" (55.7 cm)  
Frame width - 30" (76.2 cm) models - 28 15/16" (73.5 cm)  
Frame width - 36" (91.4 cm) models - 34 7/16" (87.5 cm)
- E. Cooktop height - 3 3/4" (9.6 cm)  
Cooktop height lighted knobs - 30" (76.2 cm) models - 4 15/16" (12.55 cm)  
Cooktop height lighted knobs - 36" (91.4 cm) models - 4 15/16" (12.55 cm)
- F. Cooktop height including conduit (located at rear of cooktop, right side) - 5 1/4" (13.5 cm)  
Cooktop height lighted knobs, including conduit (located at rear of cooktop, right side) - 30" (76.2 cm) models - 5 7/16" (13.5 cm)  
Cooktop height lighted knobs, including conduit (located at rear of cooktop, right side) - 30" (76.2 cm) models - 5 7/16" (13.5 cm)

30" Cooktop  
W CE55U30HS  
174

## Cabinet Dimensions

**IMPORTANT:** If installing a range hood or microwave hood combination above cooking surface, follow the range hood or microwave hood combination installation instructions for dimensional clearances above the cooktop surface.

- A. 24" (60.9 cm) on 24" models; 30" (76.2 cm) on 30" models; 36" (91.4 cm) on 36" models
- B. Combustible area above countertop (shown by dashed box above)
- C. 30" (76.2 cm) minimum clearance between top of cooktop platform and bottom of uncovered wood or metal cabinet (24" [61 cm] minimum clearance if bottom of wood or metal cabinet is covered by not less than 1/4" [0.6 cm] flame retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015" [0.04 cm] stainless steel, or 0.024" [0.06 cm] aluminum or 0.020" [0.05 cm] copper)
- D. 13" (33 cm) recommended upper cabinet depth
- E. 2" (5.1 cm)
- F. 20 1/2" (52.0 cm) recommended cutout. Will fit in cutout from 20 5/8"-20 7/8" (51.8-52.2 cm).
- G. 18" (45.7 cm) minimum clearance from upper cabinet to countertop within minimum horizontal clearances to cooktop
- H. Junction box or outlet: 7" (17.8 cm) minimum from top of countertop
- I. Junction box or outlet: 9" (23.0 cm) maximum from right side of cabinet
- J. 29 1/2" (74.9 cm) recommended cutout on 30" (76.2 cm) models. Will fit in cutout from 29 1/8"-29 7/8" (73.8-75.1 cm) on 30" (76.2 cm) models.
- K. 35 1/2" (90.2 cm) recommended cutout on 36" (91.4 cm) models. Will fit in cutout from 34 5/8"-35 3/8" (87.8-90.3 cm) on 36" (91.4 cm) models.
- L. 22 3/4" (56.67 cm) recommended cutout on 24" (60.96 cm) models.
- M. 2 1/2" (6.35 cm) minimum distance to nearest left and right side combustible surface above cooktop
- N. 1 1/2" (3.81 cm) minimum clearance between back wall and countertop

**NOTES:** After making the countertop cutout, some installations may require notching down the base cabinet side walls to clear the cooktop base. To avoid this modification, use a base cabinet with sidewalls wider than the cutout.

If cabinet has a drawer, a 5 1/2" (14.0 cm) depth clearance from the top of the countertop to the top of the drawer (or other obstruction) in base cabinet is required.

## Electrical Requirements

### ⚠ WARNING

#### Electrical Shock Hazard

Disconnect power before servicing.

Use 8 gauge copper wire.

Electrically ground cooktop.

Failure to follow these instructions can result in death, fire, or electrical shock.

If codes permit and a separate ground wire is used, it is recommended that a qualified electrical installer determine that the ground path and wire gauge are in accordance with local codes.

Check with a qualified electrical installer if you are not sure the cooktop is properly grounded.

Make sure that the electrical connection and wire size are adequate and in conformance with the National Electrical Code, ANSI/NFPA 70-latest edition or CSA Standards C22.1-94, Canadian Electrical Code, Part 1 and C22.2 No. 0-M91-latest edition, and all local codes and ordinances.

A copy of the above code standards can be obtained from:

National Fire Protection Association  
1 Batterymarch Park  
Quincy, MA 02169-7471  
CSA International  
8501 East Pleasant Valley Road  
Cleveland, OH 44131-5575

#### Before You Make the Electrical Connection:

To properly install your cooktop, you must determine the type of electrical connection you will be using and follow the instructions provided for it here.

A 3-wire or 4-wire, single phase, 120/240 volt, 60-Hz., AC only electrical supply is required on a separate, 40-amp circuit fused on both sides of the line. The model/serial number plate is located on the metal cabinet underneath the cooktop. See the following illustration.

A. Model/serial number plate

- The cooktop is rated 120/240 volt. Some models have a neutral (white) wire.
