Good morning. Lot 100B.
Hardy board above is not
too bad, but whatever
bend is there is caused
by the brickwork behind
it. We do not have any
framing there. I sent an
email to you as well.

Good morning. I took a look with Promark. The area in question is above the window over the garage. All the exterior hardy board was fasten onto the brick work above and has nothing to do with our framing. Promark believes if any work is to be done, the brick work must be adjusted. I will send you a picture of the window through text.
